The U.S. government adopted the Harmonized System on January 1, 1989 as the direct basis for its new export and import classification systems. Guam, as well as most of the nations of the world, adopted this system in January 1, 1988. Many of the local businesses have already noticed that the commodity classification code appears on incoming invoices, bills of lading or airway bills.

The Guam Department of Commerce promulgated administrative rules and regulations under the authority of title VLIV, Chapter 1, section 47064 of the Government code of Guam. These rules and regulations concern the collecting of socio-economic information from businesses and individuals.

Specifically, all documents submitted to the Guam Customs and Quarantine for release of cargo must contain the information as outlined in Section 3005.1, 3005.2 and 3005.3 of the Department of Commerce Administrative Rules and Regulations. Section 3005.1 defines imports and exports of goods and sets up guidelines to insure certain information is included on each official import and export document.

In the case of exported goods the following information is required:

- the commodity's trade name;
- the commodity's value state in U.S. dollars;
- the commodity's volume in the commodity's international standard of measurement;
- the country from which the commodity is being shipped, and;
- the commodity's identifying code number under the Schedule B Statistical Classification of Domestic and Foreign Commodities Exported from the United States. (The Schedule B Classification Code is also known as the Harmonized System).

A COMPARATIVE ANALYSIS OF GUAM'S MAJOR EXPORT COMMODITIES

Guam's export of Commodities for 2001 totaled \$60,818,519, a 17.2% decrease from 2000's total of \$73,504,986.

The following major export commodities show increase from 2001:

Jewelry Articles	367.7%
Trunks Suitcase & other Similar Bag	453.7%
Perfumes & Toilet Waters	27.7%

The following major export commodities show decrease from 2001:

Fish, Chilled, Fresh, Frozen, Dried and Salted	10.9%
Petroleum Oil and Gases	84.4%
