DEFINITION OF THE CONSUMER PRICE INDEX

The CONSUMER PRICE INDEX (CPI) is a measure of the average change in prices over time of goods and services purchased by households, both families and single person living alone. The Guam 2008 CPI is based on the concept of a representative "market basket", a sample of all goods and services that consumers purchase, as determined by the 2005 Household Income and Expenditure Survey (HIES) funded by the U.S. Dept. of Interior to the U.S. Census Bureau, and a similar in design with the U.S. CPI.

The CPI is measured from a total of 168 items from 8 major groups, and indices are computed at two different levels of aggregation. More than 1,060 price quotations are collected during the middle month of each quarter either by phone or on-site survey by qualified price enumerators. There are approximately 200 business outlets included in the construction of the CPI, ranging from grocery, department and hardware stores to a variety of service establishments. This report provides average price changes for all items, groups, subgroups and special indexes from consecutive quarters to one year earlier. An annual average and annualized inflation rate are also reported. Indexes are subject to

HOW TO INTERPRET INDEX CHANGES

A price change can be expressed as a percentage change between two periods, as a difference in index points between a given period and a base period assigned an index of 100.0. Thus, an index of 110.7 for a given period means the price level has increase by 10.7% from the base period of 100.0. It does not mean a 10.7% change from the immediately preceding period as shown in example 1:

Example I:

Period:	1st Qtr. (base period)	2nd Qtr.	3rd Qtr.
Index:	100.0	108.4	110.7
	-----8.4% change-----		-----2.1% change-----
	-----10.7% change-----		

Any period, such as the 2nd Quarter in the next example, can be converted to a base period by dividing all indices individually by the periods' index, then multiplying the results by 100.

Example II:

Period:	1st Qtr. (base period)	2nd Qtr.	3rd Qtr.
Index:	100.0	108.4	110.7
Period:		2nd Qtr. (base period)	3rd Qtr.
Index:		100.0	102.1
		-----2% change-----	

In example II, we dealt with a change in price index from a given quarter to the quarter immediately succeeding it – a 2.1% change from the second to the third quarter. However, many economic statistics, such as personal income, government revenues, and expenditure, are reported on an annual basis. The equivalent annual rate is used to determine what the index would be if a price change during a three-month period continues at the same rate for four quarters, a twelve-month period. The annual rate is often used to achieve uniformity in statistical expression.

Thus, a quarterly change of 1.0% is equivalent to an annual rate of 4.1%. If prices were to increase 1.0% each quarter for four quarters, the annual increase would be 4.1%. Derivation of this figure is shown in the Example III.

Example III:

$$P_n = P_o(1+i)^n \quad \text{where}$$

- P_n = equivalent annual rate
- P_o = base index (100.0)
- i = current rate (1.0%)
- n = number of periods (4)

Thus, $104.1 = 100.0 (1 + .01)^4$

However, the equivalent annual rate should not be interpreted as a projection or price forecast. It is only a standard form for showing price changes that have occurred. The CPI only reports what has happened, while annual projections must be based on factors which determine future price changes.

Please see www.bsp.guam.gov, for historical CPI data, and other state data resources.

GUAM CONSUMER PRICE INDEX

1. Number of commodity items:

GROUP	*GROUP WEIGHTS	NO. OF ITEMS ALLOCATED
Food	15.60	69
Housing	32.11	42
Apparel & Upkeep	7.61	23
Transportation	8.60	4
Medical Care	20.42	5
Recreation	2.97	5
Education & Communication	2.77	6
Other Goods & Services	<u>9.92</u>	<u>14</u>
	<u>100.0</u>	<u>168</u>

* Based on the 2005 Household Income and Expenditure Survey (HIES) results.

2. Base period: 4th Quarter 2007 = 100.0

3. Formula:

The index is computed by using base-weighted arithmetic average of prices. The formula used is either in the weighted aggregated form,

$$I_{oi} = \frac{\sum p_i q_o}{\sum p_o q_o} \times 100$$

or its equivalent, the weighted average of price relatives,

$$I_{oi} = \frac{\sum p_o q_o \left(\frac{P_i}{P_o} \right)}{\sum p_o q_o} \times 100$$

where p_i = the price of the commodity in the reporting period.
 p_o = the price of the commodity in the base period, and
 q_o = the quantity of commodity sold in the base period.

4. Weights:

Based on the 2005 Household Income and Expenditure Survey (HIES)

Guam Consumer Price Index (CPI)
1st Quarter 2021
Volume No. XLVII, No. 1

The Guam 2021 1st Quarter CPI of 135.8 shows a 1.2 percent over the 4th quarter of 2020, and 1.7 percent when compared to the same period one year earlier. The All Items Less Food Index increased by 1.3 percent, Energy by 2.6 percent, All Items Less Food and Energy by 1.0 percent, Commodities Less Food by 0.6 percent, Services by 1.8 percent, All Items Less Hospital Related Services by 1.3 percent as compared to the 4th quarter 2020. The purchasing power of the dollar is at \$ 0.50 when compared to the base year 1996.

The Food group index of 151.2 shows an increase of 0.4 percent over the preceding quarter and 1.3 percent when compared to the same period one year earlier. Bakery products shows a increase of 3.2 percent over the preceding quarter and 2.9 percent when compared to the same period one year earlier. Other meats products increased 6.3 percent over the preceding quarter and 8.6 percent when compared to the same period one year earlier. Poultry products increased by 2.0 percent over the preceding quarter and 6.8 percent when compared to the same period one year earlier. Eggs product decreased by -2.1 percent over the preceding quarter but increased by 2.7 percent when compared to the same period one year earlier. Dairy products increased by 2.8 percent over the preceding quarter and 2.2 percent when compared to the same period one year earlier.

The Housing group index of 116.2 shows a increase of 3.3 percent over the preceding quarter and a decrease of -2.9 percent when compared to the same period one year earlier. Rent and Lodging increased by 1.1 percent over the preceding quarter and when compared to the same period one year earlier. Electricity increased by 12.9 percent over the preceding quarter but decreased by -17.7 percent when compared to the same period one year earlier. Water, Sewer and Trash shows no changes over the preceding quarter but increased by 3.5 percent when compared to the same period one year earlier.

The Transportation group index of 103.6 shows a decrease of -1.2 percent over the preceding quarter and -0.3 when compared to the same period one year earlier. Motor Fuel prices shows a increase of 14.1 percent over the preceding quarter and 3.7 percent when compared to the same period one year earlier. New Car prices decreased by -5.7 percent over the preceding quarter and -1.6 percent when compared to the same period one year earlier.

The Medical Care group index of 189.4 shows a increase of 0.7 percent, the Education and Communication group index of 114.8 increased by 0.3 percent and the Other Goods and Services of 140.2 increased by 2.0 percent over the preceding quarter. The Recreation group index of 122.7 shows a decrease of -3.8 percent and the Apparel & Upkeep group index of 86.4 decreased by -0.1 percent over the preceding quarter.
