DEFINITION OF THE CONSUMER PRICE INDEX

The CONSUMER PRICE INDEX (CPI) is a measure of the average change in prices over time of goods and services purchased by households, both families and single person living alone. The Guam 2008 CPI is based on the concept of a representative "market basket", a sample of all goods and services that consumers purchase, as determined by the 2005 Household Income and Expenditure Survey (HIES) funded by the U.S. Dept. of Interior to the U.S. Census Bureau, and a similar in design with the U.S. CPI.

The CPI is measured from a total of 168 items from 8 major groups, and indices are computed at two different levels of aggregation. More than 1,060 price quotations are collected during the middle month of each quarter either by phone or on-site survey by qualified price enumerators. There are approximately 200 business outlets included in the construction of the CPI, ranging from grocery, department and hardware stores to a variety of service establishments. This report provides average price changes for all items, groups, subgroups and special indexes from consecutive quarters to one year earlier. An annual average and annualized inflation rate are also reported. Indexes are subject to revision.

HOW TO INTERPRET INDEX CHANGES

A price change can be expressed as a percentage change between two periods, as a difference in index points between a given period and a base period assigned an index of 100.0. Thus, an index of 110.7 for a given period means the price level has increase by 10.7% from the base period of 100.0. It does not mean a 10.7% change from the immediately preceding period as shown in example 1:

Example I:

Period:	1st Qtr. (base period)	2nd Qtr.	3rd Qtr.
Index:	100.0	108.4	110.7
		-----8.4% change-----	-----2.1% change-----
		-----10.7% change-----	

Any period, such as the 2nd Quarter in the next example, can be converted to a base period by dividing all indices individually by the periods' index, then multiplying the results by 100.

Example II:

Period:	1st Qtr. (base period)	2nd Qtr.	3rd Qtr.
Index:	100.0	108.4	110.7
Period:		2nd Qtr. (base period)	3rd Qtr.
Index:		100.0	102.1
			-----2% change-----

In example II, we dealt with a change in price index from a given quarter to the quarter immediately succeeding it – a 2.1% change from the second to the third quarter. However, many economic statistics, such as personal income, government revenues, and expenditure, are reported on an annual basis. The equivalent annual rate is used to determine what the index would be if a price change during a three-month period continues at the same rate for four quarters, a twelve-month period. The annual rate is often used to achieve uniformity in statistical expression.

Thus, a quarterly change of 1.0% is equivalent to an annual rate of 4.1%. If prices were to increase 1.0% each quarter for four quarters, the annual increase would be 4.1%. Derivation of this figure is shown in the Example III.

Example III:

$$P_n = P_o(1+i)^n \quad \text{where}$$

- P_n = equivalent annual rate
- P_o = base index (100.0)
- i = current rate (1.0%)
- n = number of periods (4)

Thus, $104.1 = 100.0 (1 + .01)^4$

However, the equivalent annual rate should not be interpreted as a projection or price forecast. It is only a standard form for showing price changes that have occurred. The CPI only reports what has happened, while annual projections must be based on factors which determine future price

Please see www.bsp.guam.gov, for historical CPI data, and other state data resources.

GUAM CONSUMER PRICE INDEX

1. Number of commodity items:

GROUP	*GROUP WEIGHTS	NO. OF ITEMS ALLOCATED
Food	15.60	69
Housing	32.11	42
Apparel & Upkeep	7.61	23
Transportation	8.60	4
Medical Care	20.42	5
Recreation	2.97	5
Education & Communication	2.77	6
Other Goods & Services	<u>9.92</u>	<u>14</u>
	100.0	<u>168</u>

* Based on the 2005 Household Income and Expenditure Survey (HIES) results.

2. Base period: 4th Quarter 2007 = 100.0

3. Formula:

The index is computed by using base-weighted arithmetic average of prices. The formula used is either in the weighted aggregated form,

$$I_{oi} = \frac{\sum p_i q_o}{\sum p_o q_o} \times 100$$

or its equivalent, the weighted average of price relatives

$$I_{oi} = \frac{\sum p_o q_o \left(\frac{P_i}{P_o} \right)}{\sum p_o q_o} \times 100$$

where p_i = the price of the commodity in the reporting period.
 p_o = the price of the commodity in the base period, and
 q_o = the quantity of commodity sold in the base period.

4. Weights:

Based on the 2005 Household Income and Expenditure Survey (HIES)

Guam Consumer Price Index (CPI)

2nd Quarter 2022

Volume No. XLVIII, No. 2

The Guam 2022 2nd Quarter CPI of 148.3 shows an increase of 3.2 percent over the 1st Quarter of 2022, and 7.6 percent when compared to the same period one year earlier. The All Items Less Food Index increased by 4.2 percent, Energy by 11.8 percent, All Items Less Food and Energy (core) Index by 1.6 percent, Commodities Less Food by 0.8 percent, and Services by 6.2 percent, as compared to the 1st Quarter of 2022. The purchasing power of the dollar decreased by \$0.01 this quarter to \$0.46 when compared to the base year 1996.

The Food Group Index of 177.6 shows an increase of 4.9 percent over the preceding quarter and 16.7 percent when compared to the same period one year earlier. Cereal product prices increased 5.6 percent over the preceding quarter and 12.6 percent when compared to the same period one year earlier. Bakery product prices increased 3.0 percent over the preceding quarter and 10.7 percent when compared to the same period one year earlier. Beef product prices increased 5.1 percent over the preceding quarter and 34.3 percent when compared to the same period one year earlier. Pork product prices increased 7.2 percent over the preceding quarter and 15.0 when compared to the same period one year earlier. Poultry product prices decreased by 8.6 percent over the preceding quarter and increased by 1.7 when compared to the same period one year earlier. Egg product prices increased 36.1 percent over the preceding quarter and 54.1 percent when compared to the same period one year earlier. Meals Away From Home product prices increased 1.5 percent over the preceding quarter and 11.0 percent when compared to the same period one year earlier.

The Housing Group Index of 132.3 shows an increase of 11.0 percent over the preceding quarter and 13.8 percent when compared to the same period one year earlier. Rent and Lodging prices increased 18.6 percent over the preceding quarter and 15.9 percent when compared to the same period one year earlier. Electricity prices increased 34.7 percent over the preceding quarter and 50.1 percent when compared to the same period one year earlier. Water, Sewer, and Trash prices show a decrease of 0.9 percent over the preceding quarter and also decreased 1.2 percent when compared to the same period one year earlier.

The Transportation Group Index of 127.0 shows an increase of 1.7 percent over the preceding quarter and 5.3 percent when compared to the same period one year earlier. New Car prices increased 0.4 percent over the preceding quarter and 8.8 percent when compared to the same period one year earlier. Motor Fuel prices increased 14.8 percent over the preceding quarter and 37.2 percent when compared to the same period one year earlier.

The Medical Care Group Index of 203.9 shows an increase of 1.7 percent over the preceding quarter. The Recreation Group Index of 136.8 shows a decrease of 1.6 percent over the preceding quarter. The Education and Communication Group Index of 117.7 shows an increase of 0.4 percent over the preceding quarter. The Apparel and Upkeep Group Index of 88.2 shows an increase of 1.7 percent over the preceding quarter.
