

A SURVEY OF RESOURCES FOR DIABETES CONTROL AND PREVENTION ON GUAM

*Guam Department of Public Health and Social Services
Diabetes Prevention and Control Program*

This report summarizes findings from a survey of diabetes service providers regarding the availability and adequacy of a spectrum of diabetes services on Guam.

Produced for the Department of Public Health and Social Services
by Dr. Annette M. David, Health Partners, L.L.C.

8/21/2009

ACKNOWLEDGEMENTS

This survey of existing resources for diabetes prevention and control on Guam was developed by Health Partners, L.L.C. for the Guam Department of Public Health and Social Services Diabetes Prevention and Control Program. Dr. Annette M. David of Health Partners, L.L.C. conceptualized and developed the survey methodology used to collect information, and served as the Technical Writer/Author for this publication. Ms. Jeanine Pacson was the Research Assistant for this project, responsible for data collection and data entry.

Ms. Rose V. Zabala, MSW and Mr. Patrick S. Luces of DPHSS provided oversight and guidance for the project. Mr. Luces, Program Coordinator for the DPHSS Diabetes Prevention and Control Program, assisted in identifying survey participants and coordinating communications with participants. The members of the Guam Diabetes Control Coalition, headed by Dr. Keith Horinouchi, provided a peer review of the survey methodology and facilitated the conduct of the survey within their own institutions.

Health Partners, L.L.C. acknowledges with appreciation the individuals representing the various agencies, institutions and establishments making up the inventory who took time from their busy schedules to complete the survey instrument and to respond to additional queries.

INTRODUCTION

Diabetes presents a major public health challenge on Guam. Over the past decades, diabetes has risen in prevalence and currently is the fourth highest cause of mortality on the island¹. Moreover, diabetes contributes to elevate the risk for heart disease, which is the leading cause of mortality. The health burden from what is often a chronic and disabling condition is compounded by the economic costs of treatment and care of diabetes itself as well as its complications, including heart disease, vascular disease, renal failure and blindness.

The Guam Department of Public Health and Social Services (DPHSS) is the designated lead agency responsible for addressing the problem of diabetes. In recent years, the DPHSS Diabetes Prevention and Control Program initiated partnerships with other stakeholders in the community to build the island's capacity to prevent and control this major cause of mortality and morbidity. To date, accomplishments include the formation of a community Diabetes Control Coalition and the initiation of the development of a comprehensive strategic plan for diabetes control on Guam.

As part of the initial needs assessment, the coalition recognized the importance of mapping out existing diabetes prevention and control resources within the island. This inventory represents a systematic effort to collect and collate information on available services and expertise relevant to diabetes prevention and control. It is anticipated that this inventory will serve as a valuable resource for diabetes prevention/control program planners, service providers and for diabetes patients and their families.

Because the availability of health services and resources is often dynamic, this inventory should be viewed as a "living document" that may change over time. To facilitate the incorporation of new information and the deletion of obsolete data, the publication is intentionally created in hard copy as a binder. An electronic database accompanying the publication should be updated to reflect the changes in the distribution and availability of community resources to combat diabetes.

Diabetes is the fourth leading cause of death on Guam.

The contents of this inventory reflect the best efforts of Health Partners, L.L.C. to assimilate and organize information provided by the various agencies, institutions, establishments and individual service providers who responded to an island-wide survey. The survey was voluntary; hence only those entities that participated are represented in the publication.

METHODOLOGY

After discussions with the DPHSS Diabetes Prevention and Control Program staff, Health Partners, L.L.C. developed a survey instrument to capture the data required for the diabetes prevention and control asset inventory. The draft survey instrument was peer-reviewed by members of the Guam Diabetes Control Coalition, and the instrument was revised to reflect the feedback from the coalition members. A copy of the final survey instrument is included in the Appendix.

A systematic search for potential providers of diabetes prevention and control services was done using the Yellow Pages of the both phone books used on Guam, as well as relevant directories of health professionals such as that published by the Guam Medical Society and the Guam Medical Association. DPHSS program staff and staff from organizations working in the area of diabetes control were queried regarding possible survey participants. All suggested participants were followed up.

Survey forms were distributed by fax, e-mail or in person. Follow-up phone calls and visits were conducted to maximize the response rate. All survey participants were informed at the outset of the nature and purpose of the survey. Responses were all voluntary.

An electronic database was developed using Microsoft Excel to record entries in submitted survey forms. Quantitative data were analyzed using summary statistics and percentages. Qualitative data were recorded, and re-classification or thematic analysis done when needed. The data collected were used to create information sheets that were collated into binders.

All information provided by the survey respondents was assumed to be valid. A separate, objective attempt to validate the data was not conducted. If responses were unclear, phone calls were made to the individual completing the survey form for clarification.

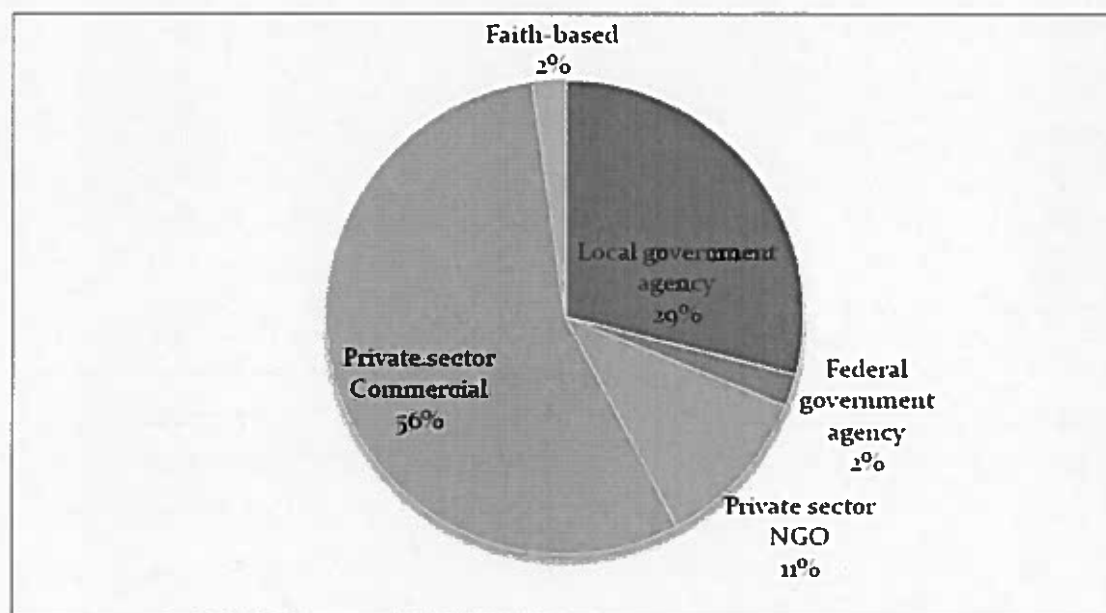

RESULTS

Respondent Demographics

Sixty (60) service providers were identified and sent survey forms. Of these, forty-six (46) returned completed forms, for a response rate of 76.7%

The respondents represented a cross-section of private and public sector service providers, with over half (56%) comprised of private sector commercial or for-profit entities (Figure 1). These were primarily made up of private clinical practices with group or solo health practitioners. Close to one-third (29%) of respondents were local government agencies, usually representing the mayors' offices in various villages. About one-tenth (11%) were private sector not-for-profit agencies or nongovernmental organizations (NGOs). Faith-based groups and federal government agencies made up 2% each of the respondent total.

Figure 1. Nature of respondents' organizations/entities

The primary nature of services offered roughly corresponded with the nature of the organization, with majority of the respondents offering clinical services (61%) followed by public service (20%). Financing and advocacy made up 7% and 6%, respectively of the total, while education, research and ancillary health care each accounted for 2% of all respondents (Figure 2).

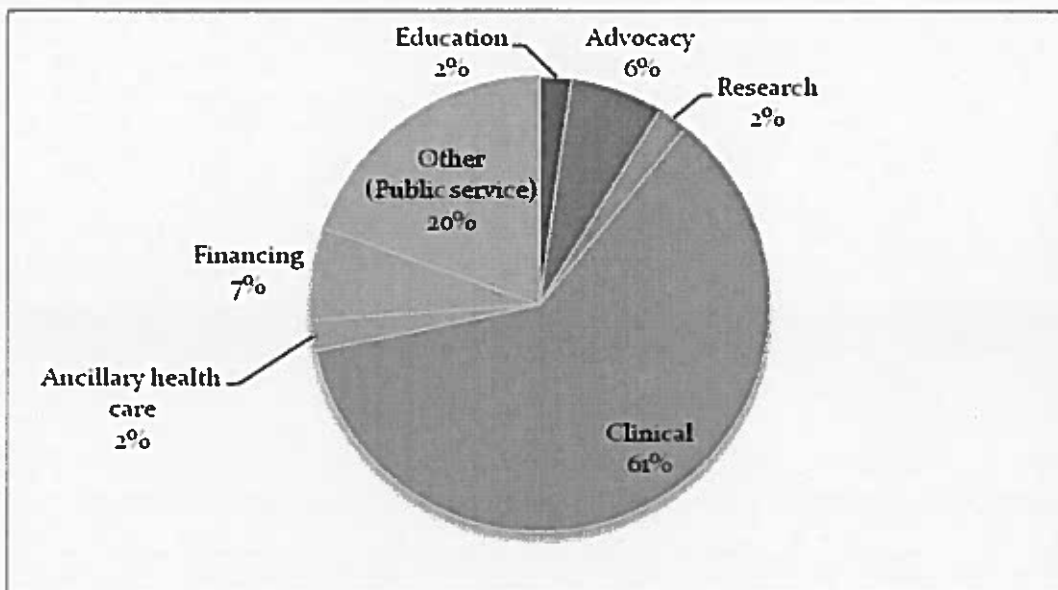

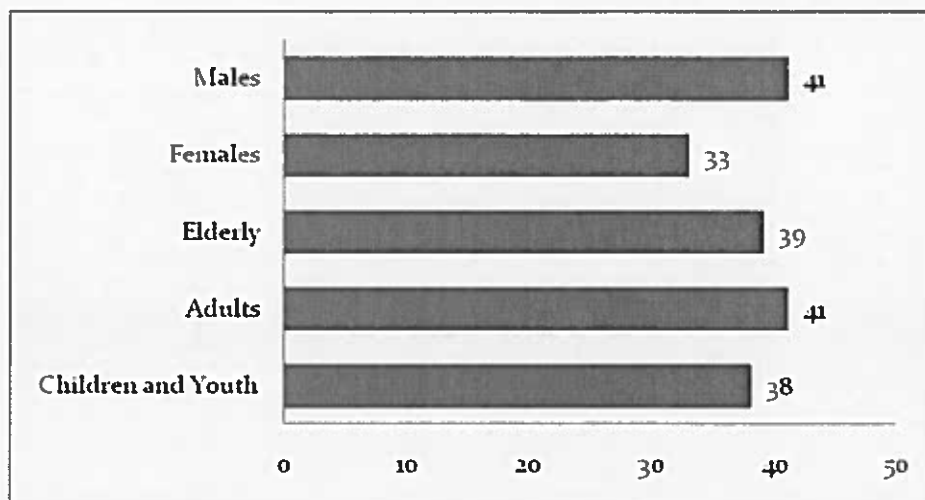

Figure 2. Nature of primary service provided***Populations served***

Table 1 and Figure 3 depict the general categories of populations served by the respondents. Table 2 and Figure 4 show the special populations served by the same respondents, while Table 3 and Figure 5 represent the various ethnic categories served.

Over 70% of respondents serve the general population categories and most ethnic sub-groups, but special populations, especially the homeless and people living with HIV and AIDs, and Other Asians are served by less than 70% of service providers surveyed.

Table 1. General categories of populations served

Population served	Children and Youth Number (% of total)	Adults Number (% of total)	Elderly Number (% of total)	Females Number (% of total)	Males Number (% of total)
Yes	38 (83%)	41 (89%)	39 (85%)	33 (72%)	41 (89%)
No	8 (17%)	5 (11%)	7 (15%)	13 (28%)	5 (11%)

Figure 3. Number of respondents serving general categories of population**Table 2. Number and percentage of respondents serving special populations**

Special populations served	LGBT Number (% of total)	Pregnant Number (% of total)	Homeless Number (% of total)	People living with HIV/AIDS Number (% of total)
Yes	31 (67%)	31 (67%)	25 (54%)	25 (54%)
No	12 (26%)	12 (26%)	18 (39%)	18 (39%)
Not Applicable	3 (6%)	3 (6%)	3 (6%)	3 (6%)

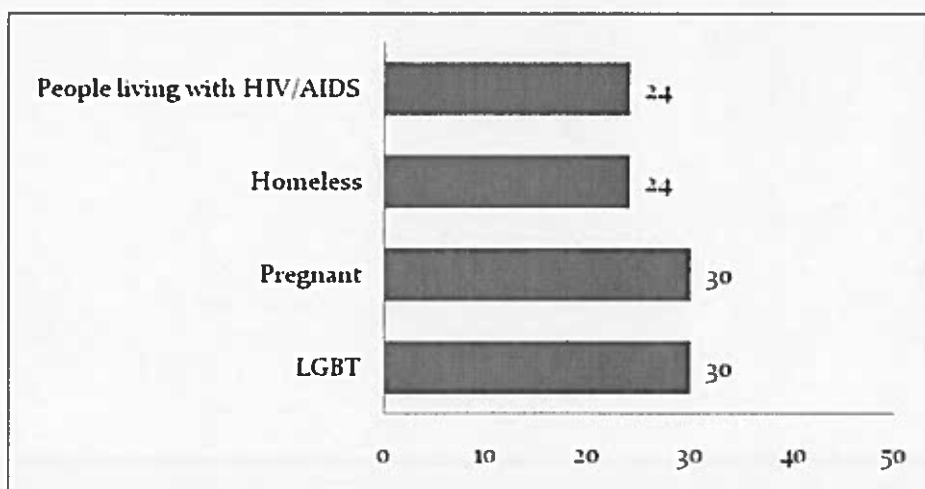

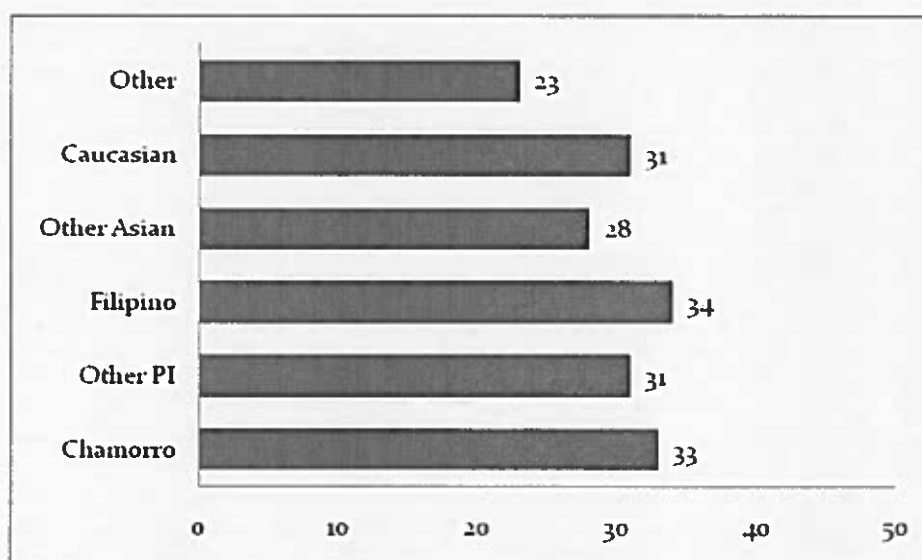

Figure 4. Number of respondents serving special populations

Table 3. Number and percentage of respondents serving ethnic sub-groups

	Chamorro Number (% of total)	Other Pacific Islander Number (% of total)	Filipino Number (% of total)	Other Asian Number (% of total)	Caucasian Number (% of total)	Other Number (% of total)
Yes	34 (74%)	32 (70%)	35 (76%)	29 (63%)	32 (70%)	24 (52%)
No	9 (19%)	11 (24%)	8 (17%)	14 (30%)	11 (24%)	19 (41%)
Not Applicable	3 (6%)	3 (6%)	3 (6%)	3 (6%)	3 (6%)	3 (6%)

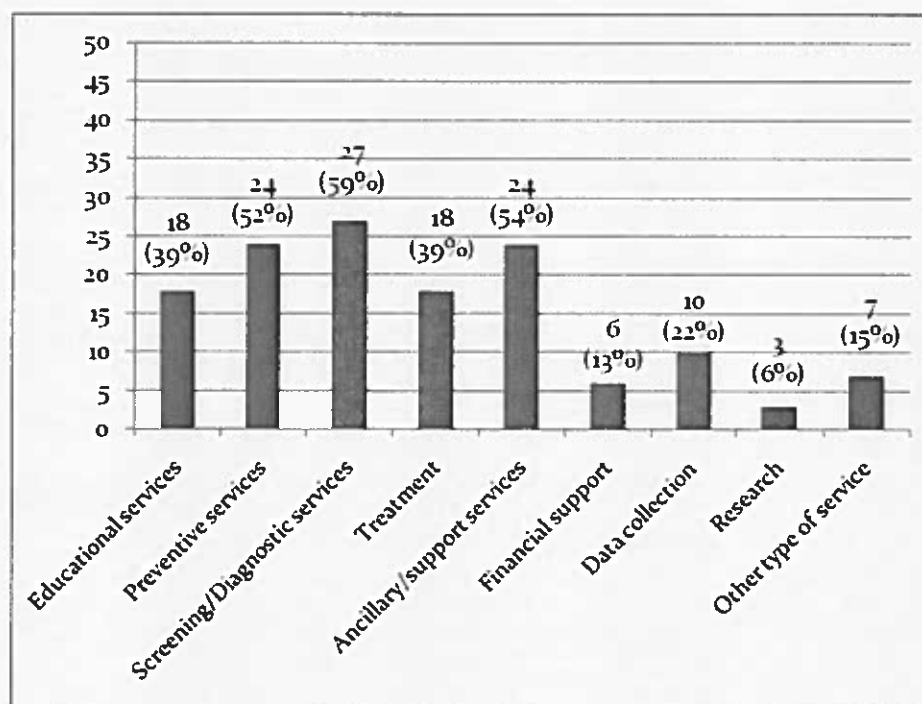

Figure 5. Number of respondents serving ethnic sub-groups

The providers surveyed reported serving the homeless, people living with HIV/AIDs and Other Asians less frequently than other population sub-groups.

Services provided

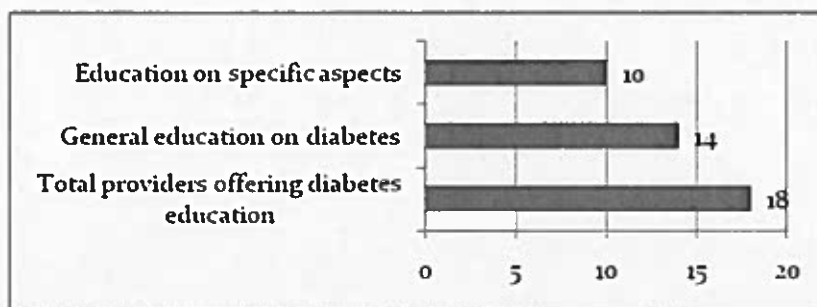

Figure 6 shows the numbers and percentages of respondents providing specific types of services for diabetes prevention and control. Screening and diagnostic services are the most frequently provided (59%) followed closely by ancillary/support services (54%) and preventive services (52%). Treatment services are provided by a little over one-third (39%) of providers surveyed. Research is the least commonly provided service, with only 6% of providers reporting that they perform some form of research on diabetes.

Figure 6. Number and percentage of service providers and nature of diabetes-related services provided

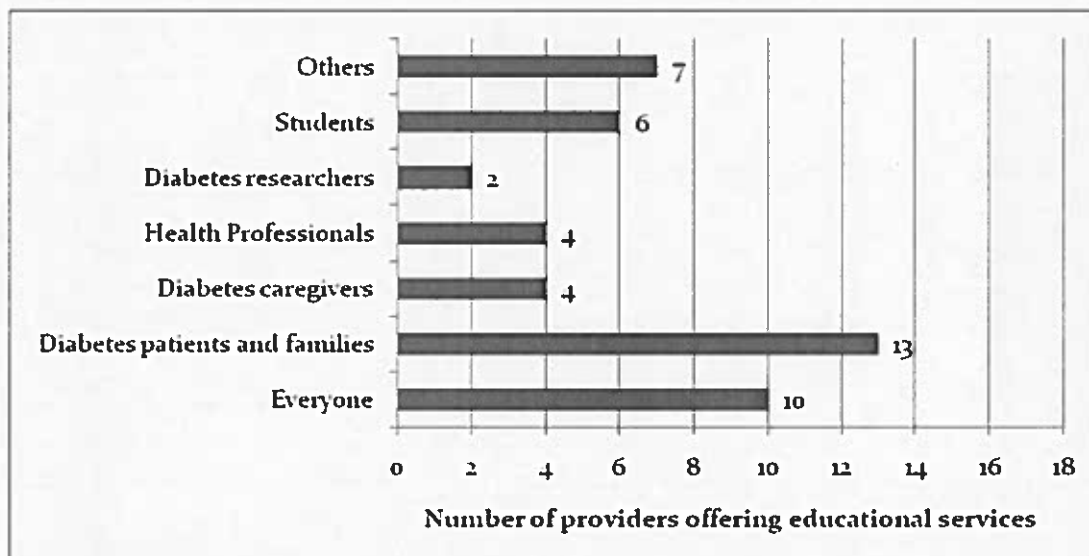

Educational Services

Eighteen of the 46 service providers (39%) reported providing education on diabetes to various groups. Of these, 14 (78%) offered general education on diabetes while 10 (56%) provided education on specific aspects of diabetes care, including, but not limited to, injecting insulin, nutrition for diabetes and diabetic foot care (Figure 7).

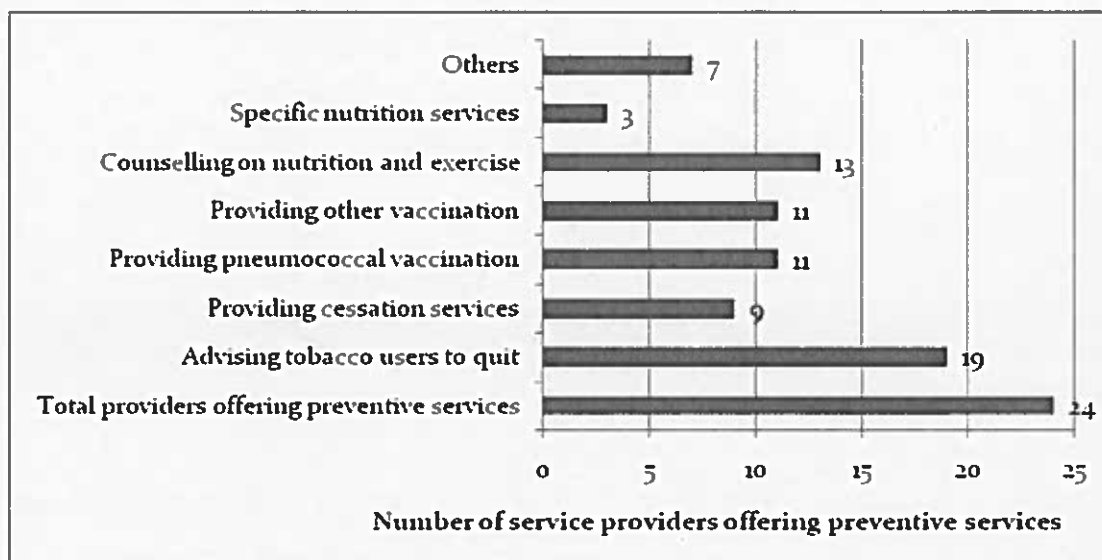

Figure 7. Number of service providers offering educational services on diabetes

Education services are provided to a variety of audiences (Figure 8).

Figure 8. Types of audiences who are offered diabetes educational services

Preventive Services

Over half (52%), or 24 out of 46, service providers reported providing diabetes-related preventive services. The most commonly offered preventive service was brief advice for tobacco cessation (79%), followed by counseling on nutrition and exercise to prevent clinical diabetes (54%). Less than half (46% or 11 of 24) of the providers who offered preventive services reported providing immunization for pneumococcal pneumonia and other vaccine-preventable diseases, and only 12% (3 of 24) reported providing specific nutritional services, such as dietary planning (Figure 9).

Figure 9. Preventive services offered by service providers

Screening and Diagnostic Services

Of the 46 respondents, 27 (59%) reported offering diabetes-related screening and/or diagnostic services. The specific laboratory services offered are depicted in Figure 10. The specific clinical services are shown in Figure 11.

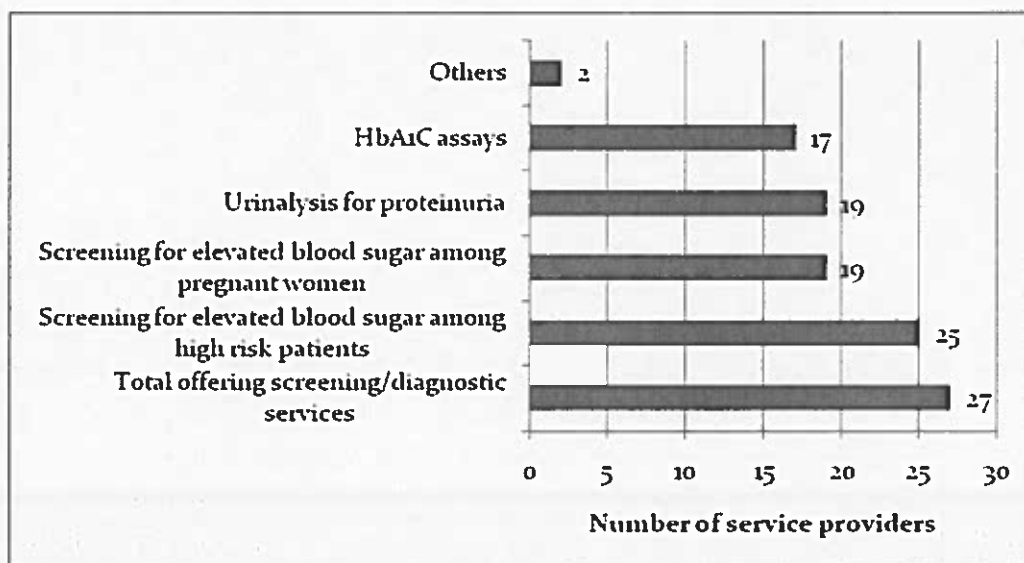

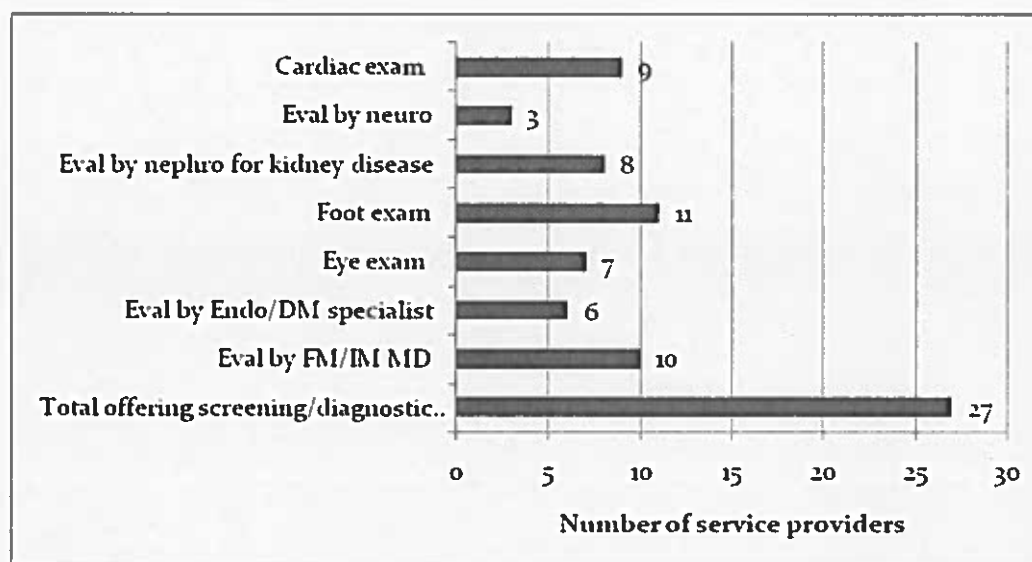

Figure 10. Screening and/or diagnostic services offered

Figure 11. Clinical diagnostics services offered

Treatment Services

Eighteen of the 46 providers (39%) offer treatment services for diabetes and diabetes related complications. Thirteen of the 18 (72%) provide outpatient medical treatment for diabetes, while 5 (28%) providers also offer inpatient medical treatment. Seven providers (39%) offer a variety of treatment services for diabetes-related complications (Table 4).

Table 4. Number of providers offering diabetes treatment services

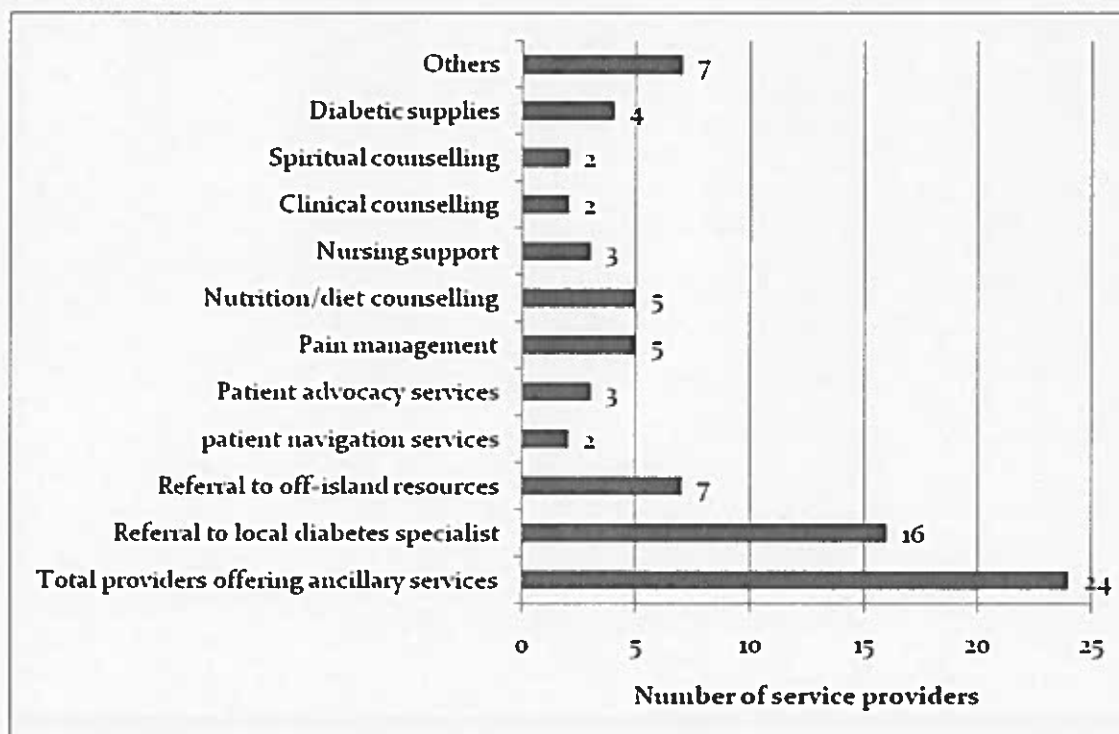

Treatment service offered	Number of providers (Total=18)	Percentage of total
Outpatient management	13	72%
Inpatient management	5	28%
Treatment for complications	7	39%
Treatment for retinopathy	5	28%
Laser eye surgery	3	17%
Other eye treatment	3	17%
Diabetic foot treatment	9	50%
Diabetic neuropathy treatment	7	39%
Diabetic heart treatment	7	39%

Diabetic kidney treatment	6	33%
Dialysis	3	17%
Other treatment for diabetic kidney disease	6	33%
Diabetic vascular disease treatment	4	22%
Angioplasty/revascularization	1	6%
Other treatment for diabetic vascular disease	3	17%

Ancillary Services

Fifty-two percent (52%), or 24 out of 46, providers reported offering ancillary services to persons with diabetes. The types of ancillary services offered are depicted in Figure 12. In relation to which local consultants the service providers refer to for the diagnosis and management of complex cases and diabetes complications, Dr. Joel Rubio (currently the only endocrinologist on Guam) was mentioned most often. In relation to which local consultants the service providers refer to for counseling and nutrition support, the Seventh Day Adventist clinic was mentioned most frequently. The Department of Public Health and Social Services was indicated by one service provider as their referral point.

Figure 12. Types of ancillary services offered

The service providers who refer to off-island medical centers indicated that they send patients to St. Luke's Medical Center in the Philippines and Good Samaritan Hospital in California.

Financial Services

Six of the 46 providers surveyed reported providing some form of financial assistance or service to diabetes patients. Of these, two provided grants or donations, with no repayment needed. Two of the respondents were private health insurance agencies and one respondent was the Bureau of Health Financing which provides financial assistance to needy families; all three provide insurance coverage for diabetes care.

Clinical Practice Characteristics

Service providers who offer clinical services for diabetes patients were asked additional questions regarding their practice characteristics. Nineteen providers responded to these questions.

Table 5 shows the number of providers reporting the presence of specially trained diabetes health professionals. The numbers reflect a scarcity in human resources for diabetes prevention and control on Guam.

Table 5. Human resources for diabetes prevention and control on Guam

Specially trained diabetes professionals	Number
Diabetes specialist	1
Diabetes nurse	0
Diabetes nutritionist	2
Diabetes educator	1
Data person	3

Figure 13 depicts the percentage of the clinical practice's clientele carrying a diagnosis of diabetes. Almost half of the clinical practices (47%) reported that 0-25% of their patients are diabetics. Two practices (10%) reported that 76-100% of their patients are diabetics.

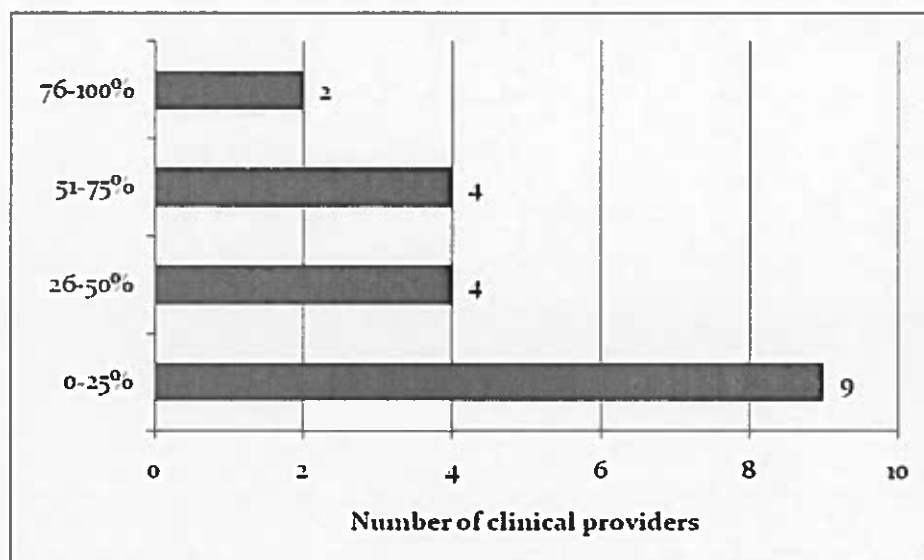

Figure 13. Percentage of clinical practice with a diagnosis of diabetes

Figure 14 shows the types of payment plans accepted by the 19 clinical providers. The data indicates that local private insurance plans and self-pay are the payment plans most commonly accepted by these providers. Most providers (84%) also accept social insurance.

Figure 14. Payment plans accepted by diabetes clinical providers

Diabetes Data

The survey respondents were also asked if they collected data on diabetes. Ten of the 46 (22%) reported collecting and storing data on diabetes. Figure 15 shows the types of data collected and Figure 16 depicts the uses for the data. "Other" uses of data included advocacy (1 provider), community information (2 providers) and provision of data at the request of clients/patients (1 provider).

All 10 providers who collect diabetes data store this in an electronic database. Three providers also maintain hard copies of their data. Eight of the 10 providers indicated a willingness to share some of their data, although none were willing to share their entire database. Five of the 8 would share a summary of their data, 4 providers would share portions of their data summary and 2 would share selected portions of their database. The barriers to data sharing were clinical confidentiality/HIPAA compliance (4 providers), research confidentiality (2 providers), data as proprietary information/owned by company (1 provider) and agency/company policy (1 provider).

Figure 15. Types of diabetes data collected

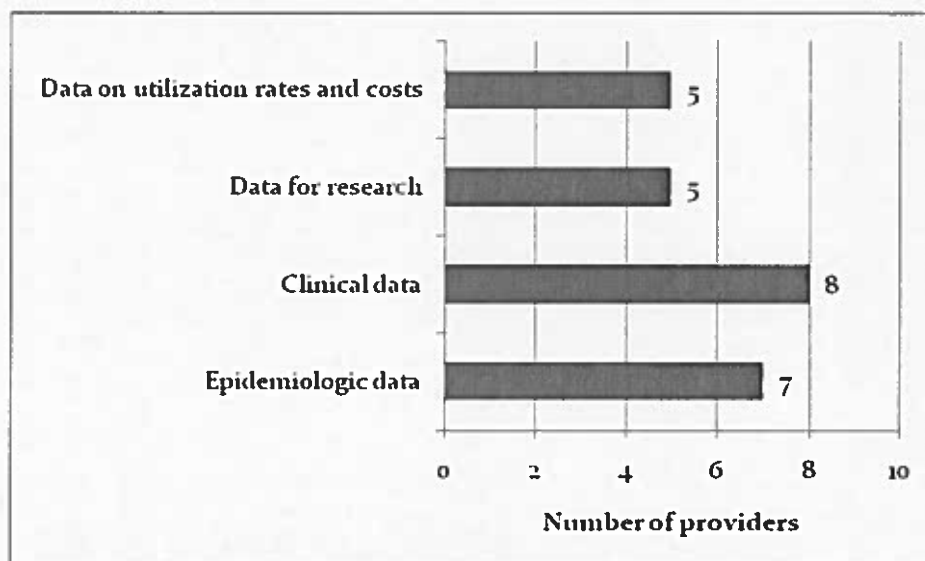

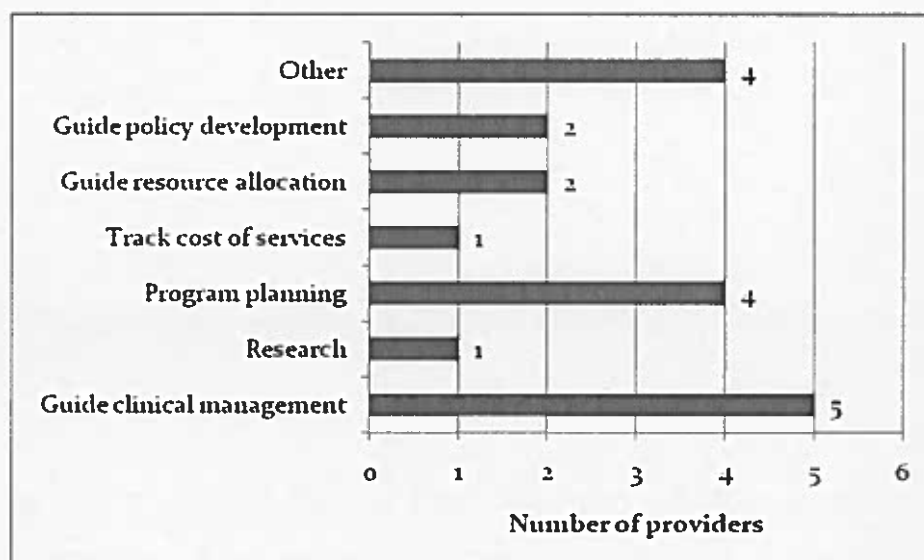

Figure 16. Uses for diabetes data

Diabetes Research

Only 3 (7%) of the 46 providers surveyed reported doing research on diabetes. The research is health-related, with 2 providers doing research on diabetes kidney disease and 1 provider doing research on the genetics of diabetes. One provider is funded through a federal grant; the other 2 providers did not provide information on their funding source.

DISCUSSION AND CONCLUSIONS

This was a voluntary survey of known providers of diverse diabetes-related services on Guam. A concerted effort to obtain responses from all known diabetes service providers was made, but a number of providers opted not to participate in the survey. The response rate to the survey was 76.7%. The respondents represented a variety of organizations and entities involved in diabetes prevention and/or control. Over half came from the private sector, primarily clinical practices.

The populations served by these practices encompassed the different categories of the general population. However, the homeless, persons living with HIV/AIDs and Other Asians were less likely to be reported as a sub-group served by the providers. If diabetes prevalence was uniformly distributed across all population sub-groups, it would indicate that these three sub-groups are relatively underserved, either because they do not avail of diabetes prevention and control services as much as the rest of the population or there are barriers to their accessing available services. Regardless of the reason, this finding may justify the need for greater outreach services to these particular population sub-groups. Also, there may be a need to further explore what barriers to diabetes service exist, if any, for these groups.

Only 4 providers in this survey reported providing financial services for diabetes care. One provider was the Bureau of Health Financing, which offers financial assistance to needy families. The other 3 were local private health insurance agencies, which require patients to purchase insurance. While the impoverished and those who can afford private insurance are covered by these financial providers, families who do not make the poverty cut-offs but are not economically well-off enough to afford private insurance are excluded from financial coverage. This represents a potentially vulnerable population subgroup that may be barred from accessing services because of financial hardship.

The providers offer assorted services that cover the spectrum of diabetes prevention and care. However, while all critical service areas are addressed, the number of providers offering each service may not be sufficient to meet the demand, given the high prevalence of diabetes on Guam. The data indicate that while preventive, screening, diagnostic and ancillary health services are available from over half of the providers responding to this survey, educational and treatment services are less likely to be offered.

Furthermore, when assessing the preventive and treatment services available, certain gaps emerge. For instance, brief cessation advice is offered by most providers but not nutritional counseling, immunization and intensive cessation counseling. On the

treatment side, routine treatment in the outpatient setting is much more available than inpatient treatment and specialized treatment for complex cases or for diabetes-related complications. In part, this may be directly related to the paucity of health professionals with specialized training in diabetes care.

These findings are consistent with the findings reported in the corresponding diabetes patient surveyⁱⁱ, which found that diabetes patients on Guam are more likely to be satisfied with preventive, lifestyle management and routine clinical services and less likely to be content with specialized care for diabetes complications and support services such as mental health counseling. However, patients are also most likely to identify education, prevention and lifestyle management as service gaps on the island. Other service gaps that were identified by diabetes patients as priorities for Guam include improved access to specialists and specialized care, specifically for diabetes complications, and financial assistance for diabetes care and medications.

In addition to the relative insufficiency in the number of providers, the quality of services provided also needs to be assessed. This survey was not designed to address this issue. Nonetheless, it is a vital one that should be looked at in the future. Indications from the corresponding patient survey point to a failure on Guam of service providers to fully comply with established clinical practice recommendations for the prevention and control of diabetes.ⁱⁱⁱ

This survey is the initial step in assessing Guam's existing resources and current needs in relation to diabetes prevention and control. The feedback from these respondents should provide guidance as the DPHSS and its partners develop a strategic plan to better address the issue of diabetes on Guam.

APPENDIX A: DIABETES PROVIDER SURVEY

Mapping of Assets and Resources for Diabetes Prevention and Control on Guam

Survey Form

1. Name of Organization: _____
2. Physical Address: _____

3. Mailing Address: _____

4. Phone number/s: (list all) _____
5. Fax number/s: (list all) _____
6. Website: _____
7. Contact Person: _____
8. Position Title: _____
9. Phone/Mobile Nos.: _____
Extension _____
10. E-mail address: _____
11. Does your organization serve (check all that apply):

☐ Children and Youth (<18) ☐ Adults (18-64) ☐ Elderly (65+)

☐ Females ☐ Males

☐ Special populations: (check all that apply)

- ☐ Lesbian/Gay/Bisexual/Transgender
☐ Pregnant females
☐ Homeless
☐ People living with HIV/AIDS
☐ Specific ethnic groups – please specify:
 ☐ Chamorro
 ☐ Other Pacific Islander: _____
 ☐ Filipino
 ☐ Other Asian: _____
 ☐ Caucasian
 ☐ Other: _____
☐ Other special population – please specify: _____

12. What is the primary nature of your organization's service? Check only ONE.

- ☐ Education ☐ Advocacy ☐ Research ☐ Clinical
☐ Ancillary health services (nursing care, counseling, nutrition support, etc.)
☐ Health financing ☐ Other: _____

13. What is the nature of your organization? Check only ONE.

- ☐ Local Government agency
☐ Federal Government agency
☐ Private sector-NGO
☐ Private sector-commercial
☐ Faith-based
☐ Other: (please specify) _____

14. Does your agency offer educational services regarding Diabetes? ☐ Yes ☐ No
If YES, what educational services are offered?

- ☐ General education on Diabetes

☐ Education on specific aspects of Diabetes care

(ex: Injecting insulin, nutrition for diabetics, diabetic foot care, etc.)

Please specify: _____

If YES, is education offered to (check all that apply):

☐ Everyone (general population)

☐ Diabetes patients and families

☐ Diabetes care givers

☐ Health professionals

☐ Diabetes researchers

☐ Students

☐ Others (e.g. clinic patients, church members, etc.)

Please specify: _____

15. Does your agency offer preventive services for diabetics? ☐ Yes ☐ No

If YES, what types of prevention services are offered? Check all that apply:

☐ Advising those who smoke/ use tobacco to quit

☐ Providing tobacco cessation services (intensive counseling, drug treatment, etc.)

☐ Providing Pneumococcal immunization

☐ Providing other immunization: (please specify)

☐ Counseling on preventing clinical diabetes through nutrition and exercise

☐ Providing specific nutrition services (diabetic cooking classes, dietary planning, etc.): _____

☐ Others; please specify: _____

16. Does your agency provide screening and/or diagnostic services for diabetes and diabetes-related complications?

☐ Yes ☐ No

If YES, what screening/diagnostic services are offered? (Check all that apply.)

LABORATORY/PATHOLOGY:

- ☐ Screening for elevated blood sugar in at-risk individuals
 - ☐ Fingertick blood sugar
 - ☐ Serum blood sugar (thru blood drawing)
 - ☐ Oral glucose tolerance test
- ☐ Screening for elevated blood sugar among pregnant women
 - ☐ Fingertick blood sugar
 - ☐ Serum random/fasting blood sugar (thru blood drawing)
 - ☐ Oral glucose tolerance test
- ☐ Urinalysis to check for protein in the urine
- ☐ HBA1C assays
- ☐ Other, please specify: _____

CLINICAL:

- ☐ Evaluation by family medicine/internal medicine physician
- ☐ Evaluation by endocrinologist or diabetes specialist
- ☐ Eye examination for diabetic retinopathy
 - ☐ By optometrist
 - ☐ By ophthalmologist (MD)
- ☐ Foot examination
- ☐ Evaluation by nephrologist/kidney specialist for diabetes-related kidney disease
- ☐ Evaluation by neurologist/nerve specialist for diabetes-related nerve or neurologic disease
- ☐ Cardiac examination for diabetes-related heart disease
 - ☐ Clinical evaluation
 - ☐ ECG

- ☐ Cardiac stress test
- ☐ Cardiac angiogram
- ☐ Other; please specify:

☐ Other, please specify: _____

RADIOLOGIC:

- ☐ Angiography for diabetes-related heart disease
- ☐ Radiologic evaluation for diabetes-related vascular disease
- ☐ Other, please specify:

17. Does your agency provide treatment for Diabetes? ☐ Yes ☐ No
If YES, what type/s of treatment do you offer? Check all that apply.

- ☐ Medical treatment for outpatient management of diabetes
- ☐ Medical treatment for inpatient management of diabetes
- ☐ Medical/surgical/radiologic treatment for diabetes complications
 - ☐ Treatment for diabetic retinopathy
 - ☐ Laser eye surgery
 - ☐ Other treatment for diabetic eye disease (please specify)
 - ☐ Treatment for diabetic foot disease
 - ☐ Treatment for diabetic neuropathy
 - ☐ Treatment for diabetic heart disease
 - ☐ Treatment for diabetic kidney disease
 - ☐ Dialysis services
 - ☐ Other treatment for diabetic kidney disease (please specify)
- ☐ Treatment for diabetic vascular disease
 - ☐ Angioplasty/revascularization
 - ☐ Other treatment for diabetic vascular disease (please specify)

18. Does your agency provide ancillary or supportive services for Diabetes patients?

☐ Yes ☐ No

If YES, what ancillary or supportive services are offered? Check all that apply:

☐ Referral to local Diabetes specialist

Which local consultant/s do you refer to for:

- a. Diagnosis of complex cases? _____
- b. Management of complex cases? _____
- c. Management of diabetes complications? _____

d. Counseling/nutrition/other support? _____

☐ Referral to Diabetes centers/medical centers when services are not available locally

Which center/s do you refer to? _____

☐ Patient navigation services

☐ Patient advocacy services

☐ Pain management

☐ Nutritional/dietary counseling

☐ Nursing support

☐ Clinical counseling

☐ Spiritual counseling

☐ Diabetic supplies (insulin syringes, fingerstick monitors/strips, etc.)

Please specify: _____

☐ Others (e.g. Make a Wish, etc.)

Please specify: _____

19. Does your agency provide financial support to Diabetes patients? ☐ Yes ☐ No
If YES, what is the nature of the financial support?

☐ Grant or donation (no repayment needed)

☐ Health care insurance coverage

Please attach a list of covered and uncovered health services.

☐ Personal loan (repayment required)

Please attach loan conditions and repayment scheme.

20. Does your agency collect data on diabetes? ☐ Yes ☐ No
If YES, what type/s of data are collected?

Type of data (Check data collected)	Confidentiality requirements (if yes, specify type: HIPAA, ethical research confidentiality etc.)	How long has data been collected? (number of years)
☐ Epidemiologic data – data on numbers of diabetes cases without personal identifiers	☐ Yes ☐ No	
☐ Clinical data on individual patients	☐ Yes ☐ No	
☐ Data for research – no personal identifiers	☐ Yes ☐ No	
☐ Data on diabetes service utilization rates and costs	☐ Yes ☐ No	
☐ Others; please specify:	☐ Yes ☐ No	

Do you store your data? ☐ Yes ☐ No

If yes, how do you store your data? (Check all that apply.)

☐ Electronic database

☐ Hard copy database

☐ Other (Please specify): _____

Do you have someone in your organization who does: (Check all that apply.)

- ☐ Data entry
- ☐ Data management
- ☐ Statistical analysis/Data analysis

What is the data used for? (Check all that apply.)

- ☐ To guide clinical management of patients
- ☐ For research
- ☐ For program planning and development
- ☐ To track costs of diabetes services
- ☐ To guide resource allocation for diabetes
- ☐ To guide policy development for diabetes prevention and control
- ☐ Other (please specify): _____

Are you willing to share data with other relevant stakeholders in diabetes prevention and control?

- ☐ Yes ☐ No

If YES, in what form/s are you willing to share data?

- ☐ Entire database
- ☐ Selected portions of database
- ☐ Summary of data
- ☐ Selected portions of data summary
- ☐ Other (please specify): _____

If NO, what prevents you from sharing data?

- ☐ Clinical confidentiality - HIPAA
- ☐ Data is proprietary information (owned by the company)
- ☐ Research confidentiality - bound by ethical research requirements
- ☐ Agency/company policy
- ☐ Other (please specify): _____

21. Does your agency provide research on Diabetes? ☐ Yes ☐ No

If YES, what type of research is being conducted? Check all that apply. If a specific group or department is conducting a specific type of research, please indicate which department or group is conducting each type of research.

- ☐ Epidemiologic research (e.g. Diabetes registry, rates of Diabetes, etc.)
- ☐ Health research on clinical aspects of diabetes
- ☐ Social research on community knowledge, beliefs, attitudes, perceptions and practices surrounding Diabetes
- ☐ Clinical trials of Diabetes therapies
- ☐ Others, please specify: _____

Who is funding your research?

☐ Federal grant (please identify-e.g. NIH, CDC, etc.): _____

☐ Local grant (please identify-e.g. DPHSS, etc.): _____

☐ NGO/Private foundation grant (Please identify granting institution):

☐ Self-funded

☐ Others; please specify: _____

22. Does your agency provide any other type of service for Diabetes patients?

☐ Yes ☐ No

If YES, please describe the type of service/s offered: _____

What service/services for diabetics are needed on Guam, in your opinion?

23. Are you aware of other agencies/groups/organizations on Guam offering services to Diabetes patients? Please list them:

24. Do you have any of the following on your staff:

Title	YES/NO	Number	Certified?
Diabetes specialist – physician (Endocrinologist or Diabetologist)			
Diabetes nurse			
Diabetes nutritionist/dietician			
Diabetes educator			
Data person collecting data on diabetes patients			

FOR CLINICAL PRACTITIONERS ONLY:

25. What percentage of the entire clinical practice has diabetes?

- ☐ 0 – 25%
- ☐ 26-50%
- ☐ 50-75%
- ☐ 76 – 100%

26. What insurance plan/s do you accept for your diabetes patients?

- ☐ Local private insurance plan/s (Check all that apply)
- ☐ Staywell
- ☐ FHP/TakeCare (formerly PacifiCare)

☐ Selectcare (also known as Calvo's insurance)

☐ Other (please specify): _____

☐ Military insurance

☐ Tricare

☐ VA insurance

☐ Other (please specify): _____

☐ Social insurance

☐ Medicare

☐ Medicaid

☐ MIP (Medically Indigent Program)\

☐ Worker's compensation

☐ Other (please specify): _____

☐ Other private insurance plan/s

☐ Blue Cross/Blue Shield

☐ Aetna

☐ AIG

☐ Other (please specify): _____

☐ Self pay

☐ Other (please specify): _____

Thank you for your cooperation in filling out this survey!
