FORMER OWNERS OF FEDERAL LANDS

BUREAU OF PLANNING

DECEMBER, 1989

FORMER OWNERS OF FEDERAL LANDS

The Bureau of Planning has coordinated the Government of Guam's federal land efforts since 1977. Since that time, frequent requests to identify former owners of federal lands have been received. For the Government's part, this information is necessary in order to obtain the views of former landowners should the Government decide to obtain federal lands for local public purposes. For the present however, the identification of former land owners is essential to determine their views on H.R. 1338 and S. 780 which are bills to return approximately 3500 acres of federal releasable lands to their former landowners. The 3500 acres constitutes approximately 8% of the total federal landholdings on Guam.

Included within this report is a partial listing of former landowners listed by military installation and by lot number. The information contained in the listing was obtained using the following methodology:

1. Maps of federal installations that identify former landholdings by lot number were obtained from the Bureau's files from which all discernable lot numbers were extracted and entered into a computerized data base.
2. Names of former landowners were obtained from Pacific Daily News advertisements relating to the Land Claims cases for Option 1 claimants and merged with the

information contained in #1 above.

The above methodology created various limitations of the report as presented below. However, these limitations do not nullify the value of the information given the purposes for which it is produced.

1. In that not all land claims have been resolved with respect to determining the amount of compensation, the list of landowners is not complete. As of the date of this report, only 10 advertisements have been compiled. As the remaining claims are resolved, the additional names will be entered into the data base. Moreover, only the claimants who have agreed to the \$39.5 Million settlement (Option 1) are currently included.

2. By identifying privately owned lands that currently comprise major military installations, owners of small areas such as road easements; owners of lands not owned by DOD such as Dept. of Interior lands; and owners of lands that are no longer owned by the military such as Agana fractional lots are not included in the listing. However, these owners are contained in the Bureau's data base even though we cannot determine the location of their former landholding at this time.

3. Private landholdings that either used the old lot numbers (e.g., "P" series lots) or those that were unsurveyed at the time of acquisition are not included in the attached listing although they are contained in the Bureau's data base.

The following is a description of the military installations included in the listing.

1. Mount Santa Rosa - This area consist of 3 separate military landholdings in Yigo on which radar facilities are currently located.

2. Radio Barrigada - The majority of this area is located between Routes 16 and 15 and includes only Navy landholdings. Navy communication facilities are located in this area, most of which is now unused. A smaller portion of Radio Barrigada is located just south of Route 15.

3. Naval Communications Station - This area is located west of Route 3, below Northwest Field.

4. Naval Magazine - This area includes munitions storage facilities in Agat/Santa Rita and the Fena Reservoir and Watershed.

5. Naval Hospital - Located in Agana Heights, this area comprises the military's principal medical facilities. It also includes the incinerator site across Route 7.

6. Naval Air Station - This area includes Brewer Field and the safety area located east of Route 16 but excludes the aircraft clear zone south of Route 8 in Toto.

7. Apra Harbor Reservation - This area contains Naval Station, Cabras Island, Sasa Valley, Masdelco, the BOQ, and the

Namo River valley located east of Route 2.

8. Apra Heights Housing Area - This area contains Navy housing just north of Route 5 in Santa Rita.

9. Nimitz Hill - This area contains COMNAVMAR and Navy Officers housing along Route 6.

10. Andersen Barrigada Annex - This area contains the Air Force communication facilities between the Navy Golf Course and Route 15.

11. Marbo - This area contains the Air Force's water wells, housing units and other facilities between Routes 1 and 15. Approximately 395 acres are located east of Route 15.

12. Andersen Air Force Base - Located at the northeastern section of the island, this installation includes all major Air Force facilities.

13. Northwest Field - Located at the northwestern tip of the island, this area contains an underused airfield. The map for this area excludes the submarine detection facility at Ritidian Point.

14. Andersen Harmon Annex - In the vicinity of Puntan Dos Amantes, this large Air Force owned area contains no major military facility.

15. Camp Edusa - Located at Wettengel Junction in Dededo, this Air Force owned property contains no military facilities.

16. Asan Annex - This area occupies both sides of Marine Drive in Asan, most of which has been included in the National Park boundaries.

17. Tarague Natural Wells - Located between Andersen Air

Force Base and Northwest Field, this area is used for munitions storage.

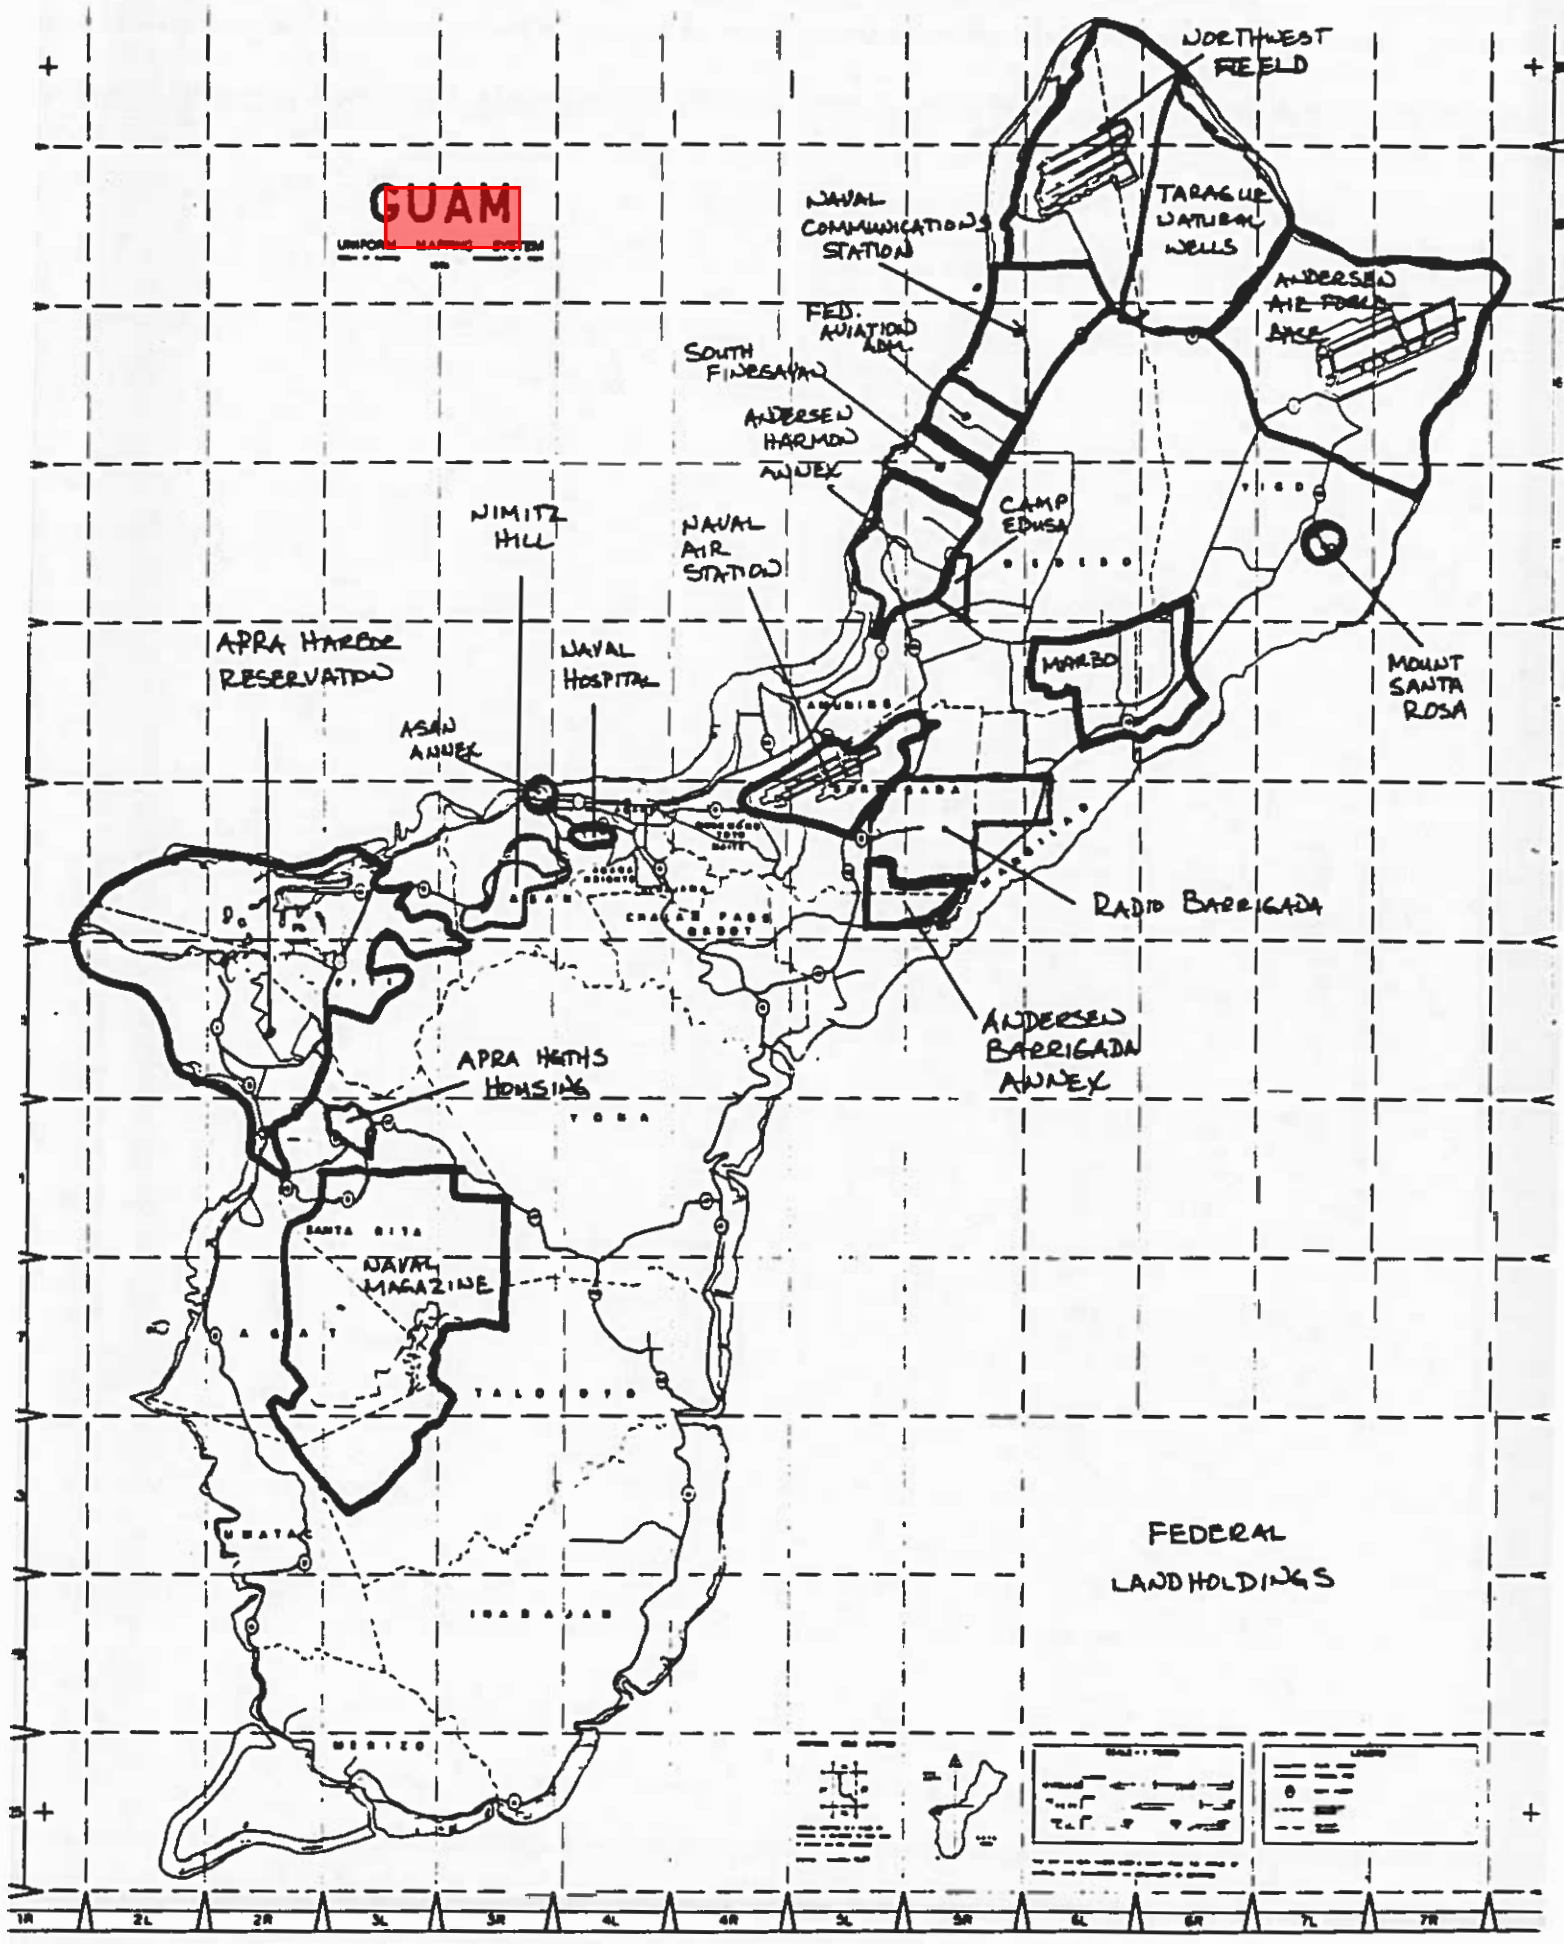

18. South Finegayan - Located west of Route 3 in Dededo, this area contains Navy housing and support facilities.

19. Federal Aviation Administration - Located north of South Finegayan, this area contain housing units formerly occupied by FAA personnel, since transferred to the Navy.

A map showing the locations of the above military installations is included in this report. It should be noted that the map and hence this study does not include all military or federally owned lands. Additionally, the listing does not currently contain parcels and landowners for the parcels comprising AAFB and FAA which will be included at a later date.
