CARLOS G. CAMACHO
GOVERNOR

It is with great pleasure that I introduce this first issue of Guam's Statistical Abstract. This publication is a prime example of the Governments continuing effort to assist the private community.

The island has witnessed a tremendous resurgence since the devastating typhoons of 1962-63 as indicated in the following tables. However, Guam's growth cannot be measured solely in dollar amounts or statistical growth. The most important factor has been the dedication of her people to the task of rebuilding.

Now that reconstruction is completed, efforts are being turned toward the challenges of the seventies. I am fully confident that we will meet them with equal success.

CARLOS G. CAMACHO

ACKNOWLEDGEMENT

Fiscal year 1970 was a year of great accomplishment for the Department of Commerce, Government of Guam, but not without hard work and sincere effort from members of a great team, the personnel of the Department of Commerce.

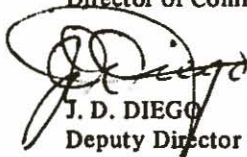

Outstanding effort was put forth by the staff of the Economic Research Center. They overcame many obstacles and endured the onslaught brought about by numerous requests for data and information concerning the economy of Guam. In a manner so enviable, they managed to exemplify the "can do" attitude, in spite of the constraints of budget and bureaucracy. They have succeeded in putting forth an image heretofore lacking in government circles.

To the staff of Economic Research Center: Walter D. Johnson, Chief Economist; Annie San Nicolas and Alvin Gumataotao, Economists; Joseph Flores, Statistician, Martha Quidachay, Mary Cruz, Annie Santos, Terry Aflague, Mae Cruz, Dolores MacDonald, Judith Kimrey, and other interim personnel, this first STATISTICAL ABSTRACT is dedicated.

And to the other individuals of the Department who have in one way or another contributed to a "job well done," a sincere "SI YUUS MAASE."

1/ Negotiations in 1968 between the U. S. Department of Commerce and the Government of Guam resulted in a change in recording procedures. The Standard International Trade Classification system in use by the United States has been adopted by Guam. The U. S. is no longer classified as a foreign port for export purposes. A second result of the 1968 negotiations was the failure to record Export-Import figures during that year.
