CARLOS G. CAMACHO
GOVERNOR

MESSAGE OF THE GOVERNOR OF GUAM

Since the first edition of Guam's STATISTICAL ABSTRACT was published in 1970, our economy has undergone dramatic changes in terms of improved income, employment, and standard of living. As in the past, this fourth edition of the STATISTICAL ABSTRACT again bears out the hard work of the people of Guam, without which the current opulence would have been but a dream.

At a time when the different parts of the world are becoming increasingly interdependent and vulnerable to external disturbances, the need for good planning is more keenly felt than ever before. In this regard, Guam is no exception. We, too, must plan in order to solve the mounting problems and to meet the challenges facing this generation. For this reason, I am particularly delighted to present this edition, reflecting the most comprehensive picture of social, political, and economic scenes as we have witnessed during the past decade. I am hopeful that future editions will depict even brighter pictures of the island economy.

I would like to thank the staff of the Economic Research Center of the Department of Commerce for their arduous work and to commend them for a job well done. To the extent that this publication will contribute to making the island a better place in which to live, our efforts will have been repaid many times over.

CARLOS G. CAMACHO

ACKNOWLEDGEMENT

In releasing the fourth edition of Guam's STATISTICAL ABSTRACT, I am happy to note several significant improvements that have been made in the quality of statistics as well as the presentation. Recognizing the importance of valid statistics and their ramifications, through a stringent internal audit system, the staff of the Economic Research Center attempts to present the user of this publication with more meaningful and reliable statistics.

For example, a completely new classification system has been adopted for the gross business receipts section. The Standard Industrial Classification (SIC) system, used in all federal business statistics, facilitates more convenient comparisons between the island economy and the rest of the nation. We will strive to excel in collecting statistics of the highest standards, for which we solicit continued support from all segments of the community.

I would like to acknowledge the excellent cooperation of the many agencies and departments of this government who have materially contributed to this publication. To my own economic staff whose painstaking work is abundantly evident in the following pages of this booklet, I extend my sincere gratitude for completing this work under most adverse conditions.

JOSE D. DIEGO
Director
Department of Commerce

**1970
CENSUS OF
POPULATION
Number of Inhabitants**

General

This report presents statistics from the 1970 Census of Population on the number of inhabitants of the area, its districts and islands and their subdivisions, and places. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress on August 31, 1954 (amended August 1957), which codified Title 13, United States Code. The law provides for the inclusion of outlying areas of U.S. sovereignty or jurisdiction. The 1970 enumeration included the following areas: American Samoa, the Canal Zone, Guam, the Trust Territory of the Pacific Islands and the Virgin Islands of the United States. Comparable statistics from earlier censuses also are presented in this report.

A major portion of the information compiled from the 1970 Census of Population will appear in Volume 1, Characteristics of the Population, of which this report is part. Collection and processing procedures: The 1970 census in this area was conducted through direct interview. Enumerators visited each household to collect the information. A single questionnaire was used, which contained all the questions to be asked about every person and household.

The 1970 census questionnaires were specially designed to be processed by FOSDIC (Film Optical Sensing Device for Input to Computers). Enumerators (and for some few items, census clerks) marked the answers in predesignated positions which could be "read" by FOSDIC from a microfilm copy of the questionnaire, onto computer magnetic tape. A more detailed description of the data collection and processing procedures can be obtained from the Bureau of the Census. Percents and symbols: Percents which round to less than 0.1 are not shown, but indicated as zero. A dash "—" signifies zero. Three dots "..." mean not applicable. A minus sign preceding a figure denotes decrease. The symbol "NA" means not available.

Boundaries: The data shown for 1970 relate to the boundaries of the areas as they existed on January 1, 1970. Information on changes between 1960 and 1970 for certain types of areas are given in footnotes to the appropriate tables. Unless otherwise indicated, the data shown for 1960 and previous years relate to the areas as defined at the time of the particular census.

USUAL PLACE OF RESIDENCE

In accordance with census practice dating back to the earliest census, each person enumerated in the 1970 census was counted as an inhabitant of his usual place of residence, which is generally construed to mean the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there may be appreciable differences for a few areas.

The implementation of this practice has resulted in the establishing of residence rules for certain categories of persons whose usual place of residence is not immediately clear. Furthermore, this practice means that persons were not always counted as residents of the place where they happened to be found by the census enumerators. Persons without a usual place of residence were, however, counted where they were enumerated.

Members of the Armed Forces living on military installations were counted as residents of the area in which the installation was located. Members of the Armed Forces not living on a military installation were counted as residents of the area in which they were living. Crews of U.S. Navy vessels were counted as residents of the home port to which the particular vessel was assigned, crews of vessels deployed to the overseas fleet were therefore not included in the resident population. Persons in Armed Forces families were counted where they were living on Census Day (e.g., the military installation, "off-base," or elsewhere, as the case might be). Crews of U.S. merchant marine vessels were counted as part of the population of the U.S. port in which their vessel was berthed on Census Day. Crews of all other U.S. merchant marine vessels are not included in the resident population.

College students, as in 1950 and 1960, were counted as residents of the area in which they were living while attending college. Inmates of institutions, who ordinarily live there for considerable periods of time, were counted as residents of the area where the institution was located; on the other hand, patients in general hospitals, who ordinarily remain for short periods of time, were counted at their homes.

Americans who were in foreign countries for an extended period (in the Armed Forces, working at civilian jobs, studying in foreign universities, etc.) are not included in the resident population. On the other hand, persons temporarily away on vacations, business trips, and the like, were counted at their usual residence. Information on such persons was obtained from other members of their families, landlords, etc. If an entire family was expected to be away during the whole period of the enumeration, information on it was obtained from neighbors. A matching process was used to eliminate duplicate reports for a person who reported for himself while away from his usual residence and who was also reported at his usual residence by someone else.

URBAN AND RURAL RESIDENCE

The reports for the Canal Zone, Guam, and the Virgin Islands include data by urban and rural residence. For the 1970 census, the urban population comprises all persons living in places of 2,500 inhabitants or more.

DISTRICTS AND SUBDIVISIONS

The primary divisions of these areas are administrative or judicial districts, or islands. For the purpose of this report, certain of these divisions are further subdivided into areas termed countries in American Samoa, quarters in the Virgin Islands, and municipalities or islands in the Trust Territory of the Pacific Islands. The various geographic divisions are identified in Tables 2 and 3.

PLACES

Places recognized in this report are generally closely settled centers of population without corporate limits. Places are reported separately where their boundaries are known locally or could be reasonably defined for census purposes. In a few instances, however, the limits of a place were defined arbitrarily.

In American Samoa, places are designated as villages; in the Canal Zone, as towns; in Guam, as cities or villages; in the Trust Territory of the Pacific Islands, as municipalities, towns, or islands; and in the Virgin Islands, as cities.

TABLE I — 1. POPULATION OF GUAM: EARLIEST CENSUS TO 1970

Census Date	Population		
	Number	Increase Over Preceding Period	
		Number	Percent
1970 (Apr. 1)	84,996	17,952	26.8
1960 (Apr. 1)	67,044	7,546	12.7
1950 (Apr. 1)	59,498	37,208	166.9
1940 (Apr. 1)	22,290*	3,781	20.4
1930 (Apr. 1)	18,509	5,234	39.4
1920 (Jan. 1)	13,275	1,469	12.4
1910	11,806	2,130	22.0
1901	9,676	—	—

*Includes native men enlisted in U.S. Navy, but excludes United States Naval Station personnel (319).

AGRICULTURAL STATISTICS

Statistical information compiled by the Department of Agriculture is gathered from various sources. Production statistics are basically derived from reports of the Extension Service Division and from volunteer information given by local farmers. Marketing data, particularly on fruits and vegetables, are obtained from retail stores, roadside stands, hotels, restaurants, the Farmers' Market, and the military. The Economic Research Center of the Guam Department of Commerce supplies the statistics on agricultural imports.

Estimates on local fruit and vegetable production are largely based on the acreage and number of bearing trees harvested. These estimates are partly cross-checked by comparing them with the quantities or volume of produce delivered to various market and consumption outlets. The Consumer and Marketing Service Division conducts weekly spot-checks of small stores to arrive at an estimate of the quantities marketed. In the case of bigger outlets, including the military, appropriate forms are being issued to these entities to record their purchases of local produce. The information is collected monthly.

Poultry and livestock figures, on the other hand, represent only population estimates taken usually at the end of a fiscal period. Fish catch data are collected monthly by the Fish and Wildlife Division through fishermen interviews and through the reports of fish weir operators.

TABLE II — 1. AGRICULTURAL AND FISHERY PRODUCTION : FY 1964-1973

Fiscal Year	Fruits & Vegetables (1,000-lbs.)	Poultry* (Number)	Eggs (Dozen)	Hogs (Head)	Cattle (Head)	Fish (Pounds)

1972	3,516	169,298	41,390	46,514	162,375	423,093
1973	4,790	221,364	44,378	59,573	168,744	499,056 ²

¹Prior to 1973, the Service Sector included Contracting, Finance, Insurance, Real Estate and Utilities. In 1973 these items were treated separately with the adoption of the Standard Industrial Classification system. However, the 1973 figure of 221,364 includes the same items for the sake of continuity. See Table II—13.

²Prior to 1973, Agriculture was not included in total gross receipts. The 1973 total of 499,056 includes 207 for Agriculture, which is not shown separately in this table.

**VOLUME AND CHARACTERISTICS
OF INTERNATIONAL TRADE BETWEEN
GUAM AND THE REST OF THE WORLD**

(STANDARD INTERNATIONAL TRADE CLASSIFICATION SYSTEM)

Negotiations in 1968 between the U.S. Department of Commerce and the Government of Guam resulted in a change in recording procedures. The Standard International Trade Code System in use by the United States has been adopted by Guam. The U.S. is no longer classified as a foreign port for export purposes. A second result of the 1968 negotiations was the failure to record export-import figures during that year.

TABLE II—28. FOREIGN TRADE : FY 1963-1972

Fiscal Year	Imports	Exports	Trade Deficit (\$)
1963	\$30,366,528	\$ 7,259,662	(23,106,866)
