Department of Commerce
Government of Guam
April 1978

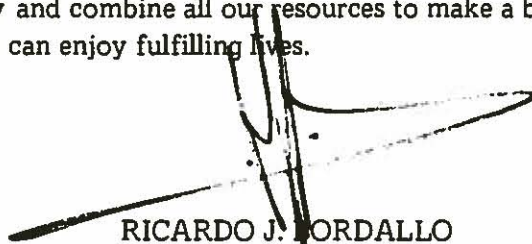

MESSAGE BY THE GOVERNOR OF GUAM

On behalf of the Guam Department of Commerce, I am proud to present the 1977 Guam Statistical Abstract, a comprehensive collection of socio-economic statistics on Guam for fiscal year 1977. Data in this annual publication are valuable planning tools for both public and private sectors of the island.

Economic indicators in this publication show some promise for a better Guam economy. The rise in business activities in selected industries is indicative of the continued efforts being made by Guam's leaders to diversify and raise the island's economic base. I continue to support the development of new industries to counter the impact of future economic interruptions originating in other areas on the island economy over which Guam has little or no control. This can be accomplished only through a close and cooperative working relationship amongst Guam's leaders in both the public and private sectors.

Let us come together in harmony and combine all our resources to make a better and prosperous paradise where all of us can enjoy fulfilling lives.

A stylized, handwritten signature in black ink, appearing to read 'Ricardo J. Bordallo'. The signature is bold and expressive, with a long horizontal stroke extending to the left and a large loop on the right.

RICARDO J. BORDALLO

ACKNOWLEDGEMENT

I am proud to present the 1977 Guam Statistical Abstract, an annual publication of the Guam Department of Commerce which has proved useful to all sectors of the island when evaluating Guam's economic situation. The 1977 Guam Statistical Abstract provides socio-economic statistics on Guam's social and economic conditions which prevailed in fiscal year 1977.

This year's volume has been significantly reduced by the elimination of obsolete data as well as financial constraints to print this year's edition. All statistics published in previous editions of the Guam Statistical Abstract can be obtained at the Department of Commerce.

I wish to acknowledge the various departments and agencies within the Government of Guam that furnished all the necessary data in this publication. Furthermore, my staff should be commended for their efforts in the compilation and tabulation of data.

My staff and I will strive continually to furnish this publication to the general public on an annual basis.

J. B. McDonald
J. B. MCDONALD

VISITOR STATISTICS

Visitor statistics are compiled from baggage declaration and entry forms required of all travelers entering Guam. Counted as visitors are all people entering Guam whose permanent address lies outside of Guam. Thus, not included among visitors are returning or intended temporary residents, such as contract workers and military personnel. The permanent address is also used to reflect country of origin.

All other information concerning visitors is based on the responses to the voluntary portion of the baggage declaration and entry form. By definition, a tourist is a visitor whose stated purpose for travel is pleasure rather than business or business and pleasure.

No. 66 VISITOR/TOURIST MARKET PROFILE: CY 1973-1977

AGRICULTURAL STATISTICS

Statistical information compiled by the Department of Agriculture is gathered from various sources. Production statistics are basically derived from periodic crop surveys and from volunteer information given by local farmers. Marketing data, particularly on fruits and vegetables, are obtained from retail stores, roadside stands, hotels, restaurants, the Farmers' Market, and the military.

Estimates on local fruit and vegetable production are largely based on the acreage and number of bearing trees harvested. These estimates are partly cross-checked by comparing them with the quantities or volume of produce delivered to various market and consumption outlets. The Consumer and Marketing Service Division conducts weekly spot-checks of small stores to arrive at an estimate of the quantities marketed. In the case of larger outlets, including the military, the information is collected monthly or annually.

Poultry and livestock figures, on the other hand, represent only population estimates taken usually at the end of a fiscal period. Fish catch data are collected monthly by the Fish and Wildlife Division through interviews with fishermen and the reports of fish weir operators.
