FOREWORD

This volume is the third edition of the annual statistical report prepared in booklet, printed form. It contains data compiled from certificates registered with the Office of Vital Statistics (these certificates can be found on the back).

Live births for the year numbered 3206 showing an increase of 138 over 1971 which registered a total of 3068. The birth rate has indicated a slight increase of .7 for every 1,000 population. A total of 2317 births or 72.3% were delivered in civilian hospital out of 3206 live births leaving 888 or 27.7% being delivered in a military hospital. One home delivery was registered.

There were 409 deaths for 1972 as compared to 364 in 1971 which provided a death rate of 4.5 per every 1,000 population. Infant mortality rate was 15.3 which is a decline from previous year which was 20.5. Fetal death was quite evident for mothers of age group 25-29. Out of 36 fetal deaths, 11 were from this age group and 6 on ages 30-34.

The total number of marriages performed on Guam during 1972 was 2095. The number has increase and this has been due primarily because of the large number of Japanese marriages. The number from Japan alone was 1091 as compared to 440 Guamanian marriages which came second. The 1972 marriage rate was 22.9 per 1,000 population.

Data for divorces and annulments are now being compiled for the first time. This has been made possible with the assistance and cooperation of the courts and attorneys in providing information necessary for the preparation of the certificate of divorce or annulment. A total of 109 divorces were registered and 16 annulments leaving a total of 125 for both. A one-year interlocutory provision is applicable in Guam.

Adoptions numbered 162 for 1972 giving a rate of 1.8 per 1,000 population is compared to 57 for 1971.
