FOREWORD

This volume is the fourth edition of the Annual Statistical Report prepared in booklet, printed form. It contains data compiled from certificates registered with the Office of Vital Statistics (these certificates can be found on the back).

Births. The year ended with only a very slight increase in live births with a total of 3234 as compared to 3206 in 1972. The birth rate as calculated on the basis of every 1,000 population (per 104,572 as released by Department of Commerce) was 30.9. Deliveries at the civilian hospital totaled 2347 leaving 886 deliveries in the military hospital with one (1) home delivery. Out of 3234 live births for the year, a total of 319 were from mothers 18 years and under, the youngest mother being 12 years old. There were 7 live births from mothers under 15 years which are all first born and illegitimates. Illegitimate births totaled 468 as compared to 394 for 1972.

Deaths. There were 435 deaths for 1973, 26 more from previous year and with a rate of 4.2 per every 1,000 population. Infant mortality rate was 23.2 which is an increase as compared to 15.3 for 1972. The fetal death was 33 with a rate of 10.2. Out of 33 deaths, asphyxia was the main ill-defined condition and accounted for 13 deaths.

Marriages. A total of 2510 marriages were performed for the year giving a rate of 24.0 per 1,000 population. The marriage rate for 1972 was 22.9. As indicated in the previous year, Japan came out again with the highest number having 1491 marriages. Guam is still on the second place.

Divorces. This is the second year since we have started compiling statistics on divorces and annulments. For the year, divorces and annulments numbered 132 giving a rate of 1.3 per 1,000 population. Out of the 132 cases recorded, 72 or 60 percent were from couples with one or more children under 18 years of age. The ages between 30-34 accounted for the highest number of divorces. A one - year interlocutory provision is applicable in Guam.
