FORWORD

This volume is the tenth edition of the Annual Statistical Report prepared in a booklet printed form. It contains data compiled from certificates registered with the Office of Vital Statistics (these certificates can be found on the back). The time period for this report is based on calendar year - 1979.

NATALITY - The number of births for the year has slightly increased. There was a 1.6% increase. There were 2950 births with a rate of 28.1 per 1,000 population as compared to 2903 for 1978 and an annual rate of 24.9.

Illegitimacy is still on the uprising with a total of 555.

Birth defects were recorded among 27 out of the 2950 births in 1979. The rate of 9.2 per 1,000 live births represents a slight decrease from 1978 when the rate was 9.6. No birth defects were recorded to mothers under 15 years of age. The lowest with one case was recorded among mothers aged 35-39 years. The highest figure of 18 cases was indicated among mothers between the ages of 20 to 29 years.

99.9% of 1979 births occurred in hospital. Only two home deliveries for the year as compared to 7 for 1978.

Premature births (5lbs. 8ozs. or less) came to a total of 245 or 8.3% of 2950 live births.

In 1979, 2.5 percent of the births were to mothers who had no prenatal care during pregnancy.

MORTALITY: A total of 377 deaths were registered for the year - a decrease of 47 deaths as compared to 1978. The 10 leading causes of death accounted for 73.7% of all deaths. The leading causes of death have remained much the same as they have in recent years except suicide. It was listed for the first time in 1977 as number 9 - it has appeared again in 1979 as number 10.

Heart disease has continued to rank as the number one cause of death accounting for 99 deaths or 26.3% of all deaths. Cancer has ranked second again with 11.9% of all deaths.

Homicide has ranked 7th among the 10 leading causes of death for 1979. However, it has decreased from 28 deaths in 1978 to 12 deaths for 1979 or 3.2%.

Of the 377 deaths for the year, 33 deaths occurred to individuals under one year of age. The frequency of infant deaths has declined from 46 in 1978 to 33 in 1979 with a rate of 11.2.

MARRIAGES: In 1979, the total number of marriages has declined by one. In terms of rates, however, there was an increase from 15.1 marriages per 1,000 population in 1978 to 16.8 in 1979. The most popular month was June with 178 Marriages followed by April with 164.

DIVORCES: There were 340 divorces for 1979, the same as in 1978. However, in terms of rates, there was an increase from 2.9 in 1978 to 3.2 in 1979 per 1,000 population.

About 10% or 37 divorces were obtained by couples married for only two years. The age group between 25-29 for women had the highest number of divorces and between the ages 30-34 for men. Also, of the 368 divorces and annulments, 37.8% or 139 cases were without children under 18 years of age. It has increased from the previous year.

DEFINITIONS

Since this report utilizes various terms and technical connotations, it is necessary to define them to aid the reader in the correct interpretation of the data. The following terms and notes are listed to achieve that objective.

BIRTH WEIGHT - Weight of fetus or infant at time of delivery.

LIVE BIRTH - The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes, or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of the voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

GESTATIONAL PERIOD - Number of weeks elapsed between the first day of the last menstrual period and date of delivery.

LIVE-BIRTH ORDER - Order number is equal to number of previous live births plus current birth.

LOW-WEIGHT - Birth wherein the weight is equivalent to 2,500 grams or less (5lbs., 8ozs.)

FETAL DEATHS - Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

INFANT DEATH - Death occurring to an individual of less than one year of age.

MATERNAL DEATH - Death wherein the physician has designated a maternal condition as the underlying cause of death.

NEONATAL DEATH - Death occurring to an infant less than 28 days of age.

OCCURRENCE - Place where the event actually occurred.

UNDERLYING CAUSE OF DEATH - That condition giving rise to the chain of events leading to death.

NATURAL INCREASE - The Excess of births over deaths.

MORTALITY

Two Lovely Girls

Contrary to the popular
belief, these two girls
were together in a final
production of the
and lived from the
same old.

Crippled Children's Services
Annual Report
October 1, 1978 to September 30, 1979

I. Description of Program

A. Goals and Objectives of the CCS Program

1. To detect handicapped or potentially handicapped children under 21 years of age residing on Guam; to provide a diagnostic evaluation and then the appropriate medical or surgical treatment, hospitalization if necessary, and continuing care in order to promote maximal physical and mental health and ability of each child to function in a society. Criteria for eligibility for CCS coverage are geared toward providing maximal service within the bounds of available resources.

B. Programs

1. CCS Rescreening
2. CCS Pediatric-Neurological
3. Cardiac
4. ENT (Ear, Nose and Throat)
5. Eye
6. Orthopedic

12. A Schistosomiasis Survey was conducted by Dr. Bayani Blas, WHO Consultant, from November 26, 1979 to December 1979. It was concluded that Schistosome micro-organism and host vector were not present on Guam, but there is a possibility of it being introduced by immigrants from endemic countries. Dr. Blas noted in his report that a distant relative, Schistosome snail host or vector of the Genus Syncera, was found on Guam. Tests must be conducted to find out if such distant snail relative can develop schistosome micro-organism.
