Certificate of Death	119
Certificate of Fetal Death	120
Certificate of Marriage	121
Certificate of Divorce and Annulment	122

This volume is the eighteenth (18) edition to the Annual Statistical Report prepared in a booklet printed form. The report, required under Section 3108 of 10 Government Code Annotated, Chapter 3, tabulates data on Guam births, deaths, infant and fetal deaths, marriages and divorces. It contains data compiled from certificates registered with the Office of Vital Statistics (these certificates can be found at the back). The time period is based on calendar year 1987.

Records received in this office from the hospitals are carefully examined for inconsistencies and are queried when needed. Annually when registration is considered complete, statistics are compiled for the report and other needed studies.

It is hoped that this report will be useful to health data users. It provides its users with an overview of the health status of Guam population. Questions and comments concerning data presented in this report should be directed to the Department of Public Health and Social Services, Office of Vital Statistics, P. O. Box 2816, Agana, Guam 96910.

In analyzing any data, the possibility of errors should not be overlooked. There are several types of possible errors, including errors by the informant as well as errors in processing and compilation. The most potentially dangerous error would be that of improper interpretation.

NATALITY - In 1987, there were 3355 live births with a birth rate of 26.3 per 1,000 population. The number of births in 1987 increased slightly over 1986.

Of the 3355 live births recorded for the year, 258 or 7.7 percent indicated as less than 5 lbs. 9 oz. and designated as low birth weight babies. The previous year had 235 or 7.1 percent of all births. There were 133 low weight births or 4 percent of all births to mothers age 15-24.

A total of 51 live births occurred as a result of multiple births, 1.5 percent of all births.

There were 485 births to teenage mothers accounting for 14.5 percent of the total births of 3355 for 1987. The total number is showing a slight increase from previous year. Age group 20-44 was responsible for 85.4 percent of all births. The youngest mother giving birth was 13 years old.

Of the 3355 live births, congenital malformation were reported on 51 live births or 1.5 percent.

In 1987 illegitimate live births came to a total of 1101 showing a rate of 328.2 per 1,000 live births as compared to 313.7 per 1,000 live births for 1986.

MORTALITY - There were 486 deaths for the year, an increase of 35 from the number reported in 1986. The death rate was 3.8 per 1,000 population and 3.6 for 1986.

Deaths to infants under one year of age numbered 25 and at a rate of 7.5 per 1,000 live births and showing a decrease. The rate for previous year was 9.4. The leading cause of infant death was certain conditions originating in the perinatal period, followed by sudden death as the second leading cause.

The first leading cause of death for the year again was diseases of the heart, accounting for 109 cases or 22.4 percent. The second was malignant neoplasms, which was the cause of 66 deaths, 13.6 percent of total deaths for the year. Cerebrovascular diseases came third again with 36 cases, 7.4 percent.

MARRIAGES - The year ended with 1512 marriages recorded at a rate of 11.9 per 1,000 population. This is showing a decrease of 10 less from previous year.

The greatest number of marriages occurred between brides within the 20-24 age group and grooms also within the 20-24 age group. Teenage marriages came to a total of 170 or 11.2 percent.

DIVORCES - Guam recorded 1257 divorces and 24 annulments for a total of 1281. The rate for divorces was 9.9 per 1,000 population - again showing an upward trend.

The most frequently cited ground for divorce was extreme cruelty which accounted for 978 followed by grievous mental suffering with 268 cases. Of the total 1281 divorces and annulments granted, 22.1 percent were between the ages of 25-29 for women and 22.2 percent for men within the same age group, 25-29.

DEFINITIONS

Since this report utilizes various terms and technical connotations, it is necessary to define them to aid the reader in the correct interpretation of the data. The following terms and notes are listed to achieve that objective.

Birth Weight	Weight of fetus or infant at time of delivery.
Live Birth	The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of the voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.
Gestational Period	Number of weeks elapsed between the first day of the last menstrual period and date of delivery.
Live-Birth Order	Order number is equal to number of previous live births plus current birth.
Low-Weight	Birth wherein the weight is equivalent to 2,500 grams or less (5 lbs., 8 ozs.) regardless of the period of gestation.
Fetal Deaths	Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.
Infant Death	Death occurring to an individual of less than one year of age.
Maternal Death	Death wherein the physician has designated a maternal condition as the underlying cause of death.
Neonatal Death	Death occurring to an infant less than 28 days of age.
Occurrence	Place where the event actually occurred.
Natural Increase	The excess of births over deaths.
Perinatal Death	Neonatal deaths plus fetal deaths
Postneonatal Death	Death of a live born infant 28-364 days of age.
Underlying Cause of Death	That condition giving rise to the chain of events leading to death.

RATES

Crude Birth Rate	= $\frac{\text{Total live births} \times 1,000}{\text{Total population}}$
Illegitimacy Rate	= $\frac{\text{Total illegitimate births} \times 1,000}{\text{Total live births}}$
Crude Death Rate	= $\frac{\text{Total deaths} \times 1,000}{\text{Total population}}$
Crude Rate of Natural Increase	= $\frac{\text{Live births minus deaths} \times 1,000}{\text{Total population}}$
Crude Divorce Rate	= $\frac{\text{Total divorces} \times 1,000}{\text{Total population}}$
Infant Mortality Rate	= $\frac{\text{Deaths under one year of age} \times 1,000}{\text{Total live births}}$
Fetal Mortality Rate	= $\frac{\text{Total fetal deaths} \times 1,000}{\text{Total live births}}$
Neonatal Mortality Rate	= $\frac{\text{Deaths less than 28 days} \times 1,000}{\text{Total live births}}$
Perinatal Mortality Rate	= $\frac{\text{Total perinatal death} \times 1,000}{\text{Total live births plus fetal deaths}}$
Marriage Rate	= $\frac{\text{Total marriages} \times 1,000}{\text{Total population}}$
Fertility Rate	= $\frac{\text{Total live births} \times 1,000}{\text{Total female population (15-44)}}$
Maternal Mortality Rate	= $\frac{\text{Total maternal deaths} \times 1,000}{\text{Total live births}}$
Low Weight Birth Rate	= $\frac{\text{Total live births weighing less than 5 lbs., 8oz.} \times 1,000}{\text{Total live births}}$
