Certificate of Marriage	121
Certificate of Divorce and Annulment	122

This volume is the nineteenth (19) edition to the Annual Statistical Report prepared on a booklet printed form.

The report, required under Section 3108 of 10 Government Code Annotated, Chapter 3, tabulates data on Guam births, deaths, infant and fetal deaths, marriages and divorces. It contains data compiled from certificates registered with the Office of Vital Statistics (these certificates can be found at the back). The time period is based on calendar year 1988.

Records received in this office from the hospitals are carefully examined for inconsistencies and are queried when necessary. Annually when registration is considered complete, statistics are compiled for the report and other needed studies.

It is hoped that this report will be useful to health data users. It provides its users with an overview of the health status of Guam population. Questions and comments concerning data presented in this report should be directed to the Department of Public Health and Social Services, Office of Vital Statistics, P. O. Box 2816, Agana, Guam 96910.

In analyzing any data, the possibility of errors should not be overlooked. There are several types of possible errors, including errors by the informant as well as errors in processing and compilation. The most potentially dangerous error would be that of improper interpretation.

NATALITY - There were 3548 births in 1988. With a population of 129,306, the birth rate was 27.4 per 1,000 population, a slight increase from previous year.

Age group between 20-29 was responsible for 2,224 births or 62.7 percent. Teenaged mothers accounted for 466 or 13.1 percent of the total births in 1988 - has decreased from previous year. There were 1,327 or 37.4 percent of all births were first births.

The low birth weight for 1988 came to a total of 272 or 7.7 percent, the same for 1987. There were 93 low weight births or 2.6 percent of all births to mothers age 15-24, indicating a decrease.

For the year, 53.4 percent of mothers began prenatal care in the first trimester; 82.3 percent during the second trimester. No prenatal care was reported for 5.4 percent.

The year ended with 51 multiple births; one set of triplets and one set of quadruplets.

Educational level of mothers - 22.4 percent of mothers had less than a high school education. This year 9.8 percent of mothers were college graduates.

The illegitimate birth rate was 322.2 per 1,000 live births as compared to 328.2 for 1987.

MORTALITY - In 1988 there were 492 deaths recorded, a very slight increase from the year previously. The crude death rate per 1,000 population was 3.8 the same rate as 1987.

Majority of men were married at the time of death, 54.5 percent while majority of women were widows, 38.5 percent. Among males, 79 were single or 26.6 percent while the corresponding figure for females was 44 or 22.6 percent.

Thirty-five infants died in 1988 before their first birthday at a rate of 9.9 per 1,000 live births and showing an increase from previous year. The leading causes of infant death were congenital anomalies (6 deaths), other conditions originating in the perinatal period (6 deaths), and respiratory distress (6 deaths).

The ranking of the top three causes of death has remained the same since 1985-1988, diseases of the heart with 26.0 percent; malignant neoplasms with 18.5 percent and cerebrovascular diseases with 5.7 percent.

MARRIAGES - In 1988, the number of marriages was 1610 with a rate of 12.5 per 1,000 population. This was a slight increase from previous year.

Age 25-29 was the most common age group for first marriages for both men and women. For 73.0 percent of the grooms and 75.8 percent of the brides, the marriage was a first marriage.

Marriages performed varies with the season. The most popular months were May with 154 marriages, June with 154 marriages and December with 157 marriages.

DIVORCES - The number of divorces reported was 1379 with a rate of 10.7 per 1,000 population - still showing an upward trend. There were 26 annulments registered for the year.

Marriages of two and three years duration had the highest numbers of divorces and annulments. About 7.7 percent of the divorces and annulments occurred in marriages of 20 years duration or longer.

The majority of husbands and wives divorced in 1988 were from 25 to 39 years of age accounting for 790 divorces and 839 divorces respectively.

Thirty-nine divorces and annulments or 2.4 percent were dissolved less than one year after the marriage took place.

DEFINITIONS

Since this report utilizes various terms and technical connotations, it is necessary to define them to aid the reader in the correct interpretation of the data. The following terms and notes are listed to achieve that objective.

Birth Weight	Weight of fetus or infant at time of delivery.
Live Birth	The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of the voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.
Gestational Period	Number of weeks elapsed between the first day of the last menstrual period and date of delivery.
Live-Birth Order	Order number is equal to number of previous live births plus current birth.
Low-Weight	Birth wherein the weight is equivalent to 2,500 grams or less (5 lbs., 8 ozs.) regardless of the period of gestation.
Fetal Deaths	Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.
Infant Death	Death occurring to an individual of less than one year of age.
Maternal Death	Death wherein the physician has designated a maternal condition as the underlying cause of death.
Neonatal Death	Death occurring to an infant less than 28 days of age.
Occurrence	Place where the event actually occurred.
Natural Increase	The excess of births over deaths.
Perinatal Death	Neonatal deaths plus fetal deaths
Postneonatal Death	Death of a live born infant 28-364 days of age.
Underlying Cause of Death	That condition giving rise to the chain of events leading to death.

RATES

Crude Birth Rate	= $\frac{\text{Total live births} \times 1,000}{\text{Total population}}$
Illegitimacy Rate	= $\frac{\text{Total illegitimate births} \times 1,000}{\text{Total live births}}$
Crude Death Rate	= $\frac{\text{Total deaths} \times 1,000}{\text{Total population}}$
Crude Rate of Natural Increase	= $\frac{\text{Live births minus deaths} \times 1,000}{\text{Total population}}$
Crude Divorce Rate	= $\frac{\text{Total divorces} \times 1,000}{\text{Total population}}$
Infant Mortality Rate	= $\frac{\text{Deaths under one year of age} \times 1,000}{\text{Total live births}}$
Fetal Mortality Rate	= $\frac{\text{Total fetal deaths} \times 1,000}{\text{Total live births}}$
Neonatal Mortality Rate	= $\frac{\text{Deaths less than 28 days} \times 1,000}{\text{Total live births}}$
Perinatal Mortality Rate	= $\frac{\text{Total perinatal death} \times 1,000}{\text{Total live births plus fetal deaths}}$
Marriage Rate	= $\frac{\text{Total marriages} \times 1,000}{\text{Total population}}$
Fertility Rate	= $\frac{\text{Total live births} \times 1,000}{\text{Total female population (15-44)}}$
Maternal Mortality Rate	= $\frac{\text{Total maternal deaths} \times 1,000}{\text{Total live births}}$
Low Weight Birth Rate	= $\frac{\text{Total live births weighing less than 5 lbs., 8oz.} \times 1,000}{\text{Total live births}}$
