Certificate of Marriage	115
Certificate of Divorce and Annulment	116

FOREWORD

This volume is the twenty-first (21st) edition to the Annual Statistical Report prepared on a booklet printed form.

The report required under Section 3108 of 10 Government Code Annotated, Chapter 3, tabulates data on Guam births, deaths, infant and fetal deaths, marriages and divorces. It contains data compiled from certificates registered with the Office of Vital Statistics (these certificates can be found at the back). The time period is based on calendar year 1990.

Records received in this office from the hospitals are carefully reviewed for inconsistencies and are queried when necessary. Annually when registration is considered complete, statistics are compiled for the report and other needed studies.

It is hoped that this report will be useful to health data users. It provides its users with an overview of the health status of Guam population.

Questions and comments concerning data presented in this report should be directed to the Department of Public Health and Social Services, Office of Vital Statistics, P.O. Box 2816, Agana, Guam 96910.

In analyzing any data, the possibility of errors should not be overlooked. There are several types of possible errors, including errors by the informant as well as errors in processing and compilation. The most potentially dangerous error would be that of improper interpretation.

NATALITY - There were 3850 live births reported In 1990, an increase of 285 from the 3565 recorded in 1989. The annual number is increasing every year since 1985, but 1990 had the largest increase - birth rate being 28.9 per 1,000 population.

Of the 3850 births in 1990, 67.5 percent received prenatal care during the first trimester of pregnancy. The percent of 91.6 began perinatal care during the second trimester. The percentage of mothers who had no prenatal care during their pregnancy was 2.6.

In 1990, 37.3 percent of the live births were first born children, compared to 39.2 percent in 1989. Among births to mothers 30 years of age and older, 9.3 percent were first born.

Teenagers - females below 20 years of age accounted for 540 births or 14.0 percent, compared to 13.5 percent in 1989. The total number of live births to mothers aged 15-44 years was 3,846 or 99.9 percent, still an increase from previous year.

Of the total 3850 live births, 280 were classified as live birth

weight or 7.3 percent. Mothers 20-24 years had the highest number of low birth weight.

The percent of 39.3 of the births in 1990 were to unmarried mothers compared to 20.3 percent for 1980 - 10 years span. Age group 20-24 to unmarried mothers accounted for 580 births.

MORTALITY - During 1990, a total of 557 deaths was registered, a slight increase as compared to 1989. The death rate was 4.2 per 1,000 population.

Of the 360 male deaths, 197 were married and 104 single. The female deaths came to a total of 197 - the marital status was 68 married, 43 single, 80 widowed and 6 divorced.

The two top causes of death for the year have remained the same since 1985 - diseases of the heart and neoplasms.

The number of infant deaths has decreased from 44 in 1989 to 33 - the rate 8.6 per 1,000 live births. There were 29 fetal deaths.

1990 ended with 38 motor vehicle accidents; 26 suicides and 16 homicides. These three causes occurred mainly among men. Twenty eight cases or 73.7 percent of all motor vehicle accidents; 23 suicides or 88.5 percent of all suicides and 14 homicides or 87.5 percent of all homicides.

MARRIAGES - The number of marriages that occurred for the year was 1433, an increase of 62 from the 1371 that occurred in 1989. The rate was 10.8 per 1,000 population.

The largest proportion of brides continued to be in the age group 20-24, accounting for 36.8 percent of all marriages. The next largest increase occurred to women 25-29 years of age with 24.8 percent.

Age at time of marriage for grooms followed a pattern similar to that of the brides 20-24 with 33.3 percent.

June was the most popular month for marriages with 147, followed by December with 143 and September with 134 marriages.

DIVORCES - For the second year in a row, the number of divorces granted has gone down from 1,147 in 1989 to 920 in 1990, the rate being 6.9 per 1,000 population.

Over half (60.5 percent) of all divorces and annulments occurred in marriages of nine years duration or less. Marriages of three and two years duration had the highest numbers of divorces and annulments.

DEFINITIONS

Since this report utilizes various terms and technical connotations, it is necessary to define them to aid the reader in the correct interpretation of the data. The following terms and notes are listed to achieve that objective.

Birth Weight	Weight of fetus or infant at time of delivery.
Live Birth	The complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of the voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.
Gestational Period	Number of weeks elapsed between the first day of the last menstrual period and date of delivery.
Live-Birth Order	Order number is equal to number of previous live births plus current birth.
Low-Weight	Birth wherein the weight is equivalent to 2,500 grams or less (5 lbs., 8 ozs.) regardless of the period of gestation.
Fetal Deaths	Death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.
Infant Death	Death occurring to an individual of less than one year of age.
Maternal Death	Death wherein the physician has designated a maternal condition as the underlying cause of death.
Neonatal Death	Death occurring to an infant less than 28 days of age.
Occurrence	Place where the event actually occurred.
Natural Increase	The excess of births over deaths.
Perinatal Death	Neonatal deaths plus fetal deaths
Postneonatal Death	Death of a live born infant 28-364 days of age.
Underlying Cause of Death	That condition giving rise to the chain of events leading to death.

RATES

Crude Birth Rate	= $\frac{\text{Total live births} \times 1,000}{\text{Total population}}$
Illegitimacy Rate	= $\frac{\text{Total illegitimate births} \times 1,000}{\text{Total live births}}$
Crude Death Rate	= $\frac{\text{Total deaths} \times 1,000}{\text{Total population}}$
Crude Rate of Natural Increase	= $\frac{\text{Live births minus deaths} \times 1,000}{\text{Total population}}$
Crude Divorce Rate	= $\frac{\text{Total divorces} \times 1,000}{\text{Total population}}$
Infant Mortality Rate	= $\frac{\text{Deaths under one year of age} \times 1,000}{\text{Total live births}}$
Fetal Mortality Rate	= $\frac{\text{Total fetal deaths} \times 1,000}{\text{Total live births}}$
Neonatal Mortality Rate	= $\frac{\text{Deaths less than 28 days} \times 1,000}{\text{Total live births}}$
Perinatal Mortality Rate	= $\frac{\text{Total perinatal death} \times 1,000}{\text{Total live births plus fetal deaths}}$
Marriage Rate	= $\frac{\text{Total marriages} \times 1,000}{\text{Total population}}$
Fertility Rate	= $\frac{\text{Total live births} \times 1,000}{\text{Total female population (15-44)}}$
Maternal Mortality Rate	= $\frac{\text{Total maternal deaths} \times 1,000}{\text{Total live births}}$
Low Weight Birth Rate	= $\frac{\text{Total live births weighing less than 5 lbs., 8oz.} \times 1,000}{\text{Total live births}}$
