DEFINITION OF THE CONSUMER PRICE INDEX

The CONSUMER PRICE INDEX (CPI) is designed to measure changes in prices of commodities and services normally purchased by the consuming community, both families and single persons living alone. The Guam CPI (like the U.S. CPI) is based on the concept of a representative "market basket", a sample of all goods and services that consumers purchase. A total of approximately 282 items are divided into major groups and sub-groups, and indices are computed at different levels of aggregation. More than 1,628 price quotations are collected during the middle month of each quarter for compiling the Guam CPI and related sub-indices. The total number of business outlets included in the construction of the CPI is approximately 80, ranging from grocery and department stores to a variety of service establishments.

HOW TO INTERPRET INDEX CHANGES

A price change can be expressed as a percentage change between two periods. It can express as a difference in index points between a given period and a base period assigned an index of 100.0. Thus, an index of 110.7 for a given period means the price level has increased by 10.7% from the fixed based period. It does not mean a 10.7% change from the immediately preceding period as shown in Example 1:

Example 1:

Period:	1 st Qtr. (base period)	2 nd Qtr.	3 rd Qtr.
Index:	100.0	108.4	110.7
		8.4% change-----	2.1% change
		----- 10.7% change-----	

Any period, such as the 2nd Quarter in the next example, can be converted to a base period by dividing all indices individually by the periods' index, then multiplying the results by 100.

Example 2:

Period:	1 st Qtr. (base period)	2 nd Qtr.	3 rd Qtr.
Index:	100.0	108.4	110.7
Period:		2 nd Qtr. (base period)	3 rd Qtr.
Index:		100.0	102.1
		-----	2% change-----

In example II, we dealt with a change in price index from a given quarter to the quarter immediately succeeding it – a 2.1% change from the second to the third quarter. However, many economic statistics, such as personal income, government revenues, and expenditure, are reported on an annual basis. The equivalent annual rate is used to determine what the index would be if a price change during a three-month period continues at the same rate for four quarters, a twelve-month period. The annual rate is often used to achieve uniformity in statistical expression.

Thus, a quarterly change of 1.0% is equivalent to an annual rate of 4.1%. If prices were to increase 1.0% each quarter for four quarters, the annual increase would be 4.1%. Derivation of this figure is shown in the Example III.

Example III: $P_n = P_o(1+i)^n$ where

P_n = equivalent annual rate
 P_o = base index (100.0)
 i = current rate (1.0%)
 n = number of periods (4)

Thus, 104.1 = $100.0 (1 + .01)^4$

However, the equivalent annual rate should not be interpreted as a projection or price forecast. It is only a standard form for showing price changes that have occurred. The CPI only reports what has happened, while annual projections must be based on factors which determine future price changes.

GUAM CONSUMER PRICE INDEX

1. Number of commodity items:

GROUP	*GROUP WEIGHTS	NO. OF ITEMS ALLOCATED
Food & Beverages	25.23	133
Housing	36.97	48
Apparel & Upkeep	7.39	45
Transportation	13.68	14
Medical Care	4.19	13
Entertainment	6.36	13
Other Goods & Services	<u>6.18</u>	<u>14</u>
	100.0	280

*Based on the 1996 Consumer Expenditure Survey (CES).

2. Base period: 3rd Quarter 1996 = 100

3. Formula:

The index is computed by using base-weighted arithmetic average of prices. The formula used is either in the weighted aggregated form,

$$I_{oi} = \frac{\sum p_i q_o}{\sum p_o q_o} \times 100$$

or its equivalent, the weighted average of price relatives,

$$I_{oi} = \frac{\sum p_o q_o \left(\frac{p_i}{p_o} \right)}{\sum p_o q_o} \times 100$$

where p_i = the price of the commodity in the reporting period.
 p_o = the price of the commodity in the base period, and
 q_o = the quantity of commodity sold in the base period.

4. Weights:

Based on the 1996 Consumer Expenditure Survey (CES)

Guam Consumer Price Index (CPI)
3rd Quarter 2006
Volume XXXII, No. 3

The Guam Consumer Price Index (CPI) of 136.81 for 3rd Quarter 2006 increased 1.25 percent over the preceding quarter and 13.35 percent when compared the same quarter one year earlier. Further comparison shows that a market basket of goods and services costing \$100.00 in October 1996 (base period) now cost \$136.81.

The 3rd Quarter 2006 index was based on 1,626 price observations of which 487 or 29.95 percent remained unchanged, 51 or 3.14 percent increased, 19 or 1.17 percent decreased, and 1,069 or 65.74 percent were not available.

The Other Goods & Services group index of 163.22 shows the largest increase over the preceding quarter of 3.90 percent. Personal and Educational Services shows an increase of 6.89 percent over the preceding quarter and 12.12 percent when compared to the same quarter one year earlier. The increase over the preceding quarter was due to higher prices reported for college tuition. Personal Care Services increased 5.57 percent over the preceding quarter due to higher priced reported for shampoo and set. Toilet Goods increased 5.25 percent over the preceding quarter due to higher prices reported for shampoo.

The Medical Care group index of 416.46 shows an increase of 2.57 percent over the preceding quarter and 73.72 percent when compared to the same quarter one year earlier. Professional Services group increased 10.33 percent over the quarter due to higher prices reported for dental services.

The Food & Beverages group index of 171.77 shows an increase of 2.40 percent over the preceding quarter and 8.74 percent when compared to the same period one year earlier. The Fresh Fruits category shows the largest increase over the preceding quarter of 10.60 percent due to higher prices reported for apples and oranges. The Fresh Vegetables category increased 7.18 percent over the preceding quarter due to higher prices reported for cabbage, onions, and string beans. The Bakery Products category increased 1.52 percent over the preceding quarter due to higher prices reported for a loaf of Pullman bread and apple turnovers.

The Housing group index of 89.06 shows an increase of 0.99 percent over the preceding quarter and 4.46 percent when compared to the same period one year earlier. The Housekeeping category increased 4.83 percent over the preceding quarter due to higher prices reported for dish soap, bleach, and bathroom tissue. The Household Appliances category increased 2.86 percent over the preceding quarter due to higher prices reported for refrigerator.

TABLE E
CONSUMER PRICE INDEX (CPI)
(3rd Quarter 1996 = 100.00)

INFLATION RATE

Calendar Year	1st Qtr.	2nd Qtr.	3rd Qtr.	4th Qtr.	Average	Annual Percent Change	INFLATION RATE
1995				95.40			
R 1996	97.69	99.90	100.00	100.89	99.62		4.95%
R 1997	101.76	101.57	100.90	101.94	101.54	1.93%	0.76%
R 1998	102.26	100.83	100.67	100.36	101.03	-0.50%	-1.10%
R 1999	101.60	102.05	103.89	103.97	102.88	1.83%	3.71%
R 2000	105.49	105.77	104.36	104.11	104.93	2.00%	-0.29%
R 2001	104.74	104.43	102.63	102.54	103.59	-1.28%	-1.34%
R 2002	103.51	103.57	103.86	106.04	104.25	0.64%	2.09%
R 2003	104.31	107.28	107.78	108.77	107.04	2.68%	4.30%
R 2004	110.62	112.51	114.09	116.34	113.39	5.94%	6.51%
2005	117.33	119.77	120.70	130.46	122.07	7.65%	12.09%
2006	131.45	135.12	136.81				

The 1st Quarter 2006 index increased 12.03 percent from the same quarter one year ago. Using the Inflation Rate formula, we calculated the inflation rate for 2005 to be 12.09 percent.

INFLATION RATE FORMULA:

$$\frac{(\text{4th Qtr. 2005} + \text{1st Qtr. 2006}) - (\text{4th Qtr. 2004} + \text{1st Qtr. 2005})}{(\text{4th Qtr. 2005} + \text{1st Qtr. 2006})} \times 100 = 12.09\%$$
